Your suggestion on teaching & learning for the next year
Online class is the best option in this situation
Even though nowadays online classes are preferred, I insist on the regular classes because more interaction among students and teachers directly will greatly influence on our studies.
As usual.
Conduct online classes if necessary..
Conduct online classes if necessary..
The potions should be reduced from the books, and not increase the burden of childrens by covering up potions fastly
We have lost a lot of classes due to this lockdown but it should not affect the pace at which the portions are to be completed
Using online platforms and it resources can enrich the students and teachers with new and improved information about their topics . There might be technical issues but its now or never.
Online class is only hope for the situation but consider everyone have availabilities of Internet
ONLINE CLASSES & EXAMS ARE ALWAYS BETTER.SO , EVERYONE IS SAFE AT THERE OWN PLACES .MAYBE AFTER COVID 19 SOME OTHER DISASTER WILL COME.ðŸ˜©
Considering this covid situation, Online classes will be better
More of online classes
Don't rush to take exams....that is a bad move and if anything gets out of order...the Goodwill of the institution will be 0
Classes must be simple , teachers must interact with students sometime and portions must take in a moderate speed
Online classes are not better but if no way we can consider,
It would be great if we start to take a deviation from the traditional ways of teaching like the one in classrooms. Comeon let's get this more practical!(not jst like in physics or chemistry labs)but way more practical;for instance, going out into the

industrial field once in awhile(in concern with food technology students), making it more useful for the future jobs awaiting us. In my opinion, practical ways of teaching could change the whole scenario of 'spoonfeed' educational systems.
Teaching and learning not through online class
It would be great if we start to take a deviation from the traditional ways of teaching like the one in classrooms. Comeon let's get this more practical!(not jst like in physics or chemistry labs)but way more practical;for instance, going out into the industrial field once in awhile(in concern with food technology students), making it more useful for the future jobs awaiting us. In my opinion, practical ways of teaching could change the whole scenario of 'spoonfeed' educational systems.
I would never suggest online class. It wont be useful. They must teach things which is more practically useful. Bookish teaching should be changed a little bit.
Well as we all know that now we are facing a difficult situation (CORONA). So we the students are tensed about our education. And not sure weather the normal classes will go smoothly in the college campus. So I prefer the students should study in the campus than the online classes .but we don't know what will be the situation.
The portions are not over yet. So teachers are requested to give less pressure on students at this situation of covid 19.lookiing forward for online classes.Maybe a zoomcall on Google classroom etc.
Online classes
No need of online class students are cheating in online classes showing like the are watching but not and it's waste of time in my opinion we should wait for the ordinary classes to start no need of online class
Continue the way it is.
I don't agree the online classes..
Some students does not have internet in their home so they can't attent online classes continuously. We have to make sure that all students have internet system and they had the knowledge to use it properly.
In my opinion online class and normal classes are both needed for next year.. Because it will help us to relearn and rewind the topics.. It also help the students who miss the classes..
Online classes is very helpful for the students but after that students will suffer so many helath issues. While using online classes the result will be very poor. Full time online classes are not possible for students . Assignment and seminars can be conducted through online to aviod time wastage.
Prepare for online class
My frnds have this onlinil class bt they tolde that it is just lyk wasting tym..no one understand that what the teacher is teaching..so in ma opinion online class is not needed it is such a wasting time
Nothng
I don't think we need to conduct the semester exams. Final sem exams needs to be conducted. It's a huge waste of time and a huge inconvenience to students. We can give marks according to the first year sem marks. I am not saying this because I am lazy,if I was, I wouldn't have bothered writing this. It is really important to note that all students are okay with the above mentioned idea. You can conduct a survey about it and decide. It is really going to be a busy schedule ,adding exams , it will only make the situation worse. We also need to conduct first sem improvement exams and supplies and just think about those students,I would say it's torture. And if any students wants to write the sem examination instead of getting marks based on their first sem exams, special exams can be conducted for those students seperately after everything cools down.i sincerely hope and request you to atleast consider this suggestion and help the students instead of burdening and torturing them. We must focus on the present and try to make the future exams more perfect than spending our time to conduct those exams in the past. Thank you for reading
Good teaching
Don't be too late to reopen classes

CHRIST COLLEGE (AUTONOMOUS), IRINJALAKUDA

Make classes online by video conferencing
Provide classes through online mode will help us to study and consume quarantine time better
Don't know it's going to be a 75percent more strict than ever
Dont overload students with special classes
Online and offline classes may be using Microsoft teams or google
Actually it's good but internet problem will face by us
Online
Online classes
Online class
Normal classes is better than online classes
No
Academic classes reduce periods
Online education
Portions should be reduced and only the important areas and topics in the portions should be maintained without compromising the quality of subject.
Online class are better
The system was to be more simple & powerful ðŸ¤¸also reduce the stress among students to bother about their continues studies& make it so cool & approved the necessary things only ðŸ™•
The system was to be more simple & powerful ðŸ¤¸also reduce the stress among students to bother about their continues studies& make it so cool & approved the necessary things only ðŸ™•
We don't know what disaster upcoming to us, so Try to complete the portions on the time and conduct more online classes.
Online classes maybe better to avoid all the tensions and worries . As we should continue our social distancing computerising will help ur to overcome this pandemic ... In my opinion it is better not to begin classes because all the students come from different places and itâ€™s a high risk ...it would be easy if we have online class to reduce the risk of the pandemic .
Make notes on telegram channels,so we can attend lectures online download notes from channels Eg:make physics channel with all physics professor each professor make notes on different chapters
Theachers should have to notice the students those are below average level in studies and should give them special attention .
As per your decision.
I suggest the online classes will be less effective than the normal. The lessons will be more complicated and the students won't be able to understand the class properly in the online class. The regular system using compulsory masks is better than the online classes
We must follow new trends and innovative methods in the field of education and teaching in the upcoming year.
ðŸ˜‚ðŸ˜‚ðŸ˜‚

Survey & Suggestions from Christ College students conducted by Students IQAC (May-2020-lockdown period)

CHRIST COLLEGE (AUTONOMOUS), IRINJALAKUDA

Online classes.
What about semester and internal exams?
Classrooms are always the best.. not everyone has the facilities to study through online
It should be conducted as per the situation of the country ..classes should be conducted safely and must check both the health of students and teachers
The following are my suggestions: *Try to make the pending sem exam of this year online *Conduct online classes on platforms like zoom till the condition gets better(but do not take attendance here as there will be many children who don't have net connectivity) *Make video lessons.. (Teachers,Please make sure to take classes the same way as you teach in the classes..dont compel them to teach in English ..)
Online class must be started
Classes should started on colleges respectively by time. Thanks.
Kalathinothath
As before
More online classes, pdf of reference books should be provided
Online classes but in an interesting way not like laggy
Take class in online
Some missed classes in online is fine
Usually
Online sessions will be more effective to revise on the topics before exam as well as to clarify doubts on certain topics So I genuinely suggest for online classes too.

Survey & Suggestions from Christ College students conducted by Students IQAC (May-2020-lockdown period)

CHRIST COLLEGE (AUTONOMOUS), IRINJALAKUDA

Should be the same
Regular classes.
Prefering online cls wil be better for over current situation
COVID IS NOT GOING TO DISSAPPEAR ALL OF A SUDDEN...SO ONLINE CLASSES WILL BE GOOD AS ITS SAFE
Online class
Online classes
Online class is comfortable
Nothing
We are degree students so that we can continue our studies at anywhere because of the technology...self study must be encouraged..
I hope the Supplementary exams and results come out before admission.More use of technology .A curriculum more focused on future of students.
Proper teaching should be needed
Continue in same way. But only after covid 19 problem's only then.students from other districts can join.
Most teachers of Christ are very punctual and they completed their portions within the exact time. But someone is lagging so they have alot of portions to complete during this corona period. If they were little bit faster portions may be finished before closing the college during corona. So   for next year I suggest to avoid such a situation.
Just continue like this.
Proper teaching should be needed
Online classes
I am very well concerned about my graduation and further studies.Next academic year if the classes reopen i suggest to move faster with the portions and the celebrations should become the second preference,or else we can even have Saturday classes
It depents on the current situation If this pademic is controllable The lectures can be continued as usual
Should be more student oriented.
Don't give students more stress on studies coming years because of corona virus
Start online class with the teachers who have proper knowledge about online cls.upload the vedios of lectures so we will get all important topics if there is any internet poroblem too.
As Usual
According to the future situation if not possible..only course can be applied
Through online classes
May be the situation will improve and get better education & classes
I think online classes should be provided.
I think its time to move for online classes and make a platform to get references in library.
In my opinion try to short the syllabus, because the next academic year will late to start.So it is very difficult to cover up the portion to the teachers and students.

Survey & Suggestions from Christ College students conducted by Students IQAC (May-2020-lockdown period)

CHRIST COLLEGE (AUTONOMOUS), IRINJALAKUDA

Combination of online and on classroom coaching
Even if online classes is gonna be implemented...all u can study better is only through teacher student class face to face interactions...interaction with frnds...college atmosphere so and so...only that make u built up a better person in u rather sitting in home front of a lap or android being like a robotic person...I know this is a serious pandemic yet why we can't cut out other unnecessary programs and holidays of coming up back to normal days of a year...so we could get more days for studies...
Better conduct classes with scheduled timing for different classes
Through online classes
Engane class vachalm timin theerknm
online classes
Next year online classes will be good
Classroom based
Get organized
Good Teaching
It should be effordable to us..
Online class for each subject by their respective teachers
Try to avoid classroom education maximum. Grant permission to attend college for practical purposes only. Because there are lots of kids who travel a long way. Most children and teachers rely on public transportation for travel. So everyone has to deal with a lot of people. As such, we need to avoid such social interactions, as long as they are among us.
Online classes are more helpful for future studies.so I suggest we do that way.
After normal class hours ,I think online classes are even better than stressing students for special classes ..
Syllabus must be completed within time because now students are facing difficulties in studying alone in lockdown days as the syllabus are not completed also now students have a lot of doubt regarding the portions not covered yet.
The fact that the college is more interested in conducting exams even though the portions are incomplete, proves that the college is only interested in the exams and it's results rather than imparting knowledge to the students. Interactive online classes are technically impossible as of now due to low internet speeds, and if they aren't interactive, they are pointless. We should rather stick with the regular classroom model of learning. I haven't subscribed to christ opencourseware as there isn't a single video uploaded by my department or it's teachers as of now.
Nothing
Conduct class by maintaining social distance among each other
Online classes are better in this situation.
Should provide correct syllabus and propr class
It's better to opt online classes with PPT and slides extra otherwise more complicated to coplete an academic year like this situations.its also important to ensure that the students are able to meet the requirements needed for online education.Before teaching proper training also necessary.I think the aged teachers not ready for such a teaching method.But it is more important today.
Classroom education with interaction with all students is important and efficient. Online classes for easily subjects is okay
I suggest Online class for teaching & learning

Survey & Suggestions from Christ College students conducted by Students IQAC (May-2020-lockdown period)

CHRIST COLLEGE (AUTONOMOUS), IRINJALAKUDA

Minimise portions and exams.
Consider the possibilities of virtual classrooms and Webinars. Ensure that all the decisions taken by the College authority reaches every student. Consider the possibilities of private online platform to give the lectures and exams. Online exams are possible to an extent. But most of them may disagree with this but note that the exams like NEET ,JEE are computer based. Encourage the use of e- library. And may provide access to students to some online library c/o college. Strict deadlines on submitting the assignment.that may help the students to keep in touch with the syllabus. The online platform is ought to be encrypted. An app for only Christ college students.So we can bring everything in all in one.
Online classes are help for next year
Could try to shit calsses online conduct quizzes and exams etc
None
I believe that this situation will get better and we will be able to attend lectures in our classroom. It is the traditional and more convenient method to learn. However if the situation is still complicated I'd suggest online classes.
As a massive campus which offers a wide verity of courses christ college has a massive population of students coming from different part of the state they are met with a problem of travel as public transport is dead. Even if it fully functional in the future we still face the problem of getting transmitted as we are more prone to pathogens due to travel. So in my opinion colleges should promote more online classes and exams. Universities should reduced unwanted syllabus And make it online friendly. Maybe halt or take down academics for languages for bsc courses
If things are back to normal then there should be normal regular classes and less online classes.
Efficient teaching
Online notes are more comfortable for learning purpose
Online class
Online classes
It is ok to me the online classes , because of this covid situation.But the regular class is more better than online class.
Google Classroom may come handy.
Nothing
We should have online classes and online examinations .
Need online class for our studies
Normal classes.... Not online because it is too difficult to learn that way.....

Survey & Suggestions from Christ College students conducted by Students IQAC (May-2020-lockdown period)

CHRIST COLLEGE (AUTONOMOUS), IRINJALAKUDA

Notes are needed Pdf can't be trusted..
Online classes
I would prefer classroom education more
Online education is better but I think it's not practical
I would be better if the iqac gives a proper idea about their plan.. 2nd sem PG students has both pending internal examinations & external.. Some of the portions are pending.. I wouldn't suggest you to prefer Online education, which you think as a better option.. Even i face several network errors.. And many of my colleagues faces too bit difficult through online.. And conducting exams as per current scenario would be not easier in these monthsðŸ˜¶
Good
Online is enough for everyone one .all of them have mobiles and pc with them
Take online classes
Teaching at classroom is more better than online classes.
It will be good when teachers give us a note or study materials. I don't completely support online classes because all students will be not able to absorb from it
My opinion teachers will be using online classes
Government should give free wifi facilities for students (atleast for those who are economically backward), because all did not have equal access to e -learning.
Conduct online classes and try to avoid huge projects and praticals for the last year biological students
Online classes
I think regular classes are better than online classes. I prefer regular classes with certain precautions.
Online classes are preferable. But all of the students cannot afford to meet up the initial cost to set up the atmosphere for online classes for example a smartphone /laptop, a live internet connection and so on .
Good opinion
No
Online classrooms and exams
What ever method students must understand the concepts
More online classes must be required,
Please, switch to online classes.

Survey & Suggestions from Christ College students conducted by Students IQAC (May-2020-lockdown period)

CHRIST COLLEGE (AUTONOMOUS), IRINJALAKUDA

Due to the present dangerous situation regarding the covid-19 the next year classes will be in online classes
On my opinion syllabus can be reduced
Much easier than now
I prefer online classess
Just leave the intermediate SEM
Face masks should become mandatory. Students should be provided with awareness about the need for maintaining safe distance in public places. Classrooms shouldn't be congested. I prefer individual seats over benches.
I prefer online classes
Syllabus should be easy.
In my opinion, teacher should continue the classes as same as degree first year
nil
Online learning
No suggestions
Online class are better
Totaly confused à´†à´£àµ•.In my opnion online class à´Žà´²àµàµà´²à´¾à´°àµàµà´, useful à´†à´•àµàµà•à´¿à´¯à´¾àµ½ à´¨à´²àµàµà´²à´¤à´¾à´¯à´¿à´°àµà´•àµàµà´,. à´ªà´•àµàµà´·àµ à´•àµà´²à´¾à´¸àµà´¿àµ½ à´‰à´¸àµà´³ à´ªàµà´²àµ à´¶àµàµà´°à´¦àµà§à´¿à´•àµàµà´•àµàµà´• à´Žà´³àµà´ªàµà´ªà´®à´®à´²àµàµ? à´®à´²à´¯à´³à´, à´†à´¯à´¤àµà´²àµàµà•àµŠà´£àµà´Ÿàµàµà´Ÿàµà´à´¿à´¯à´¾à´·à´¾à´£àµ...
If the teachers are able to upload the contents in YouTube, it will be helpful. Notes can be sended as pdf
The coming day are not good then only online education
Online education system is good but its not acceptable for all because of internet issues and consentraation and obervation of classrs is less than platform classes...
Online education system is good but its not acceptable for all because of internet issues and consentraation and obervation of classrs is less than platform classes...
Should use online classes better
I don't know how it will be . But it will more convenient than the previous years
In this scenario, we might be forcible to adapt to new changes in educational field. So, encouraging online classes and assignments would be better. May I ask a doubt too. I heard that college timing is shifting to forenoon only. Will that happen in order to support part time job?
I think its good to cover some of the portions of the coming semester through online
Should use online classes is better
As per early year.class can be conducted Saturday's too.
Keep all Saturdays as working days and try to finish the portions as fast as possible because college students mainly depend on self studies to prepare for the exam and time taken for classes will not be productive enough to compensate the loss occurred due to the pandemic.
Gradually phase back to normal with online classes at the start
More video lectures.It should be explained not by simply reading out the prepared notes. Should also prefer bilanguage (malayalam and eng)

Survey & Suggestions from Christ College students conducted by Students IQAC (May-2020-lockdown period)

CHRIST COLLEGE (AUTONOMOUS), IRINJALAKUDA

Better not to start classes in college... Bcoz our clg has pupils from all districts.. Upto date notes and online classes are much better.. Life is important.. If we live only.. We can attain our goals
Teachers are supporting for our studies and we achieve all
We are forced to Conduct online classes. But as a mathematics student it will be hard with out a classroom
Online classinekkal nallath saadhaa class Anu. Nerit kelkkumbol paada bhagangal manasilakkan eluppamanu.
Teachers are supporting for our studies and we achieve all
Shorten the teaching material
More video lectures. Prefer not to read simply the prepared notes. Also use bilanguage both mala and eng
If covid19 is not completely recovered I strongly recommend for online classes from June 1st week
I would prefer to conduct online classes these days...and it will be highly grateful as we have to move on with the present situation
Really I can't say anything about that
Either portions should be reduced or online teaching systems should be introduced
What ever you(management) decide,I'll be with youðŸ'•
In this stage online class is better for us . And also teachers can share their notes to students. And take online exams . It will help students to prepare for main exam.
I am a person who prefers college teaching more than the online classes. So i would prefer if classes are conducted the way it was before. Still we could include online classes as well and make it faster. It would be nice if nothing gets avoided to the epidemic. It would be a loss to us. And we expect us to get notified of the exams atleast some time before so that we can be prepared and i would request that the gap between exams may please be not reduced on this behalf
Class starting time 9.20pm-3.45 comfortable time
Stil going good no comments
It would be better if we switch to online classes .
Online classes are expected.
If u start online class,it would be easy but won't understand what students actual doubt is.This should be clarified using a face to face conservation.Better don't present online class in youtube try something else.Bcoz there are better professors in youtube.So students will not even give a slight attention to the video.   Next i would say make a time everyone could attend.And those who doesn't have mobile data pack ,please provide a seperate package for those people..That's all to say.Take necessary actions for a better success for all students
Maximum convince the student their Class
Students should give some more freedom ...like college s in ...olden days .....oru faculties studied in that freedom.we also want that kind of freedom..
Nothing
In my opinion teaching and learning for the next year. In many education institutions decision to move their classes online or close the campus . Rather I am thinking about how we can teach in time of uncertainty. First option is online class. But I am thinking some students who don't have a safe environment at home. So students who have found a community within the college or student who relay on college for their sustenance and security . 1.wear mask 2.seat arrangement one bunch 3 students. 3. wash hand with sanitizer. 4.keep 2meter distance.
On my opinion syllabus can be reduced

Survey & Suggestions from Christ College students conducted by Students IQAC (May-2020-lockdown period)

CHRIST COLLEGE (AUTONOMOUS), IRINJALAKUDA

Yes
Do something,I don't care what it is
Online ebooks according to the syllabus should be incorporated in the college website. More online classes should be conducted. Students should be free to place their queries regarding academics in the college website. Online exams should be conducted if necessary. There should not be a situation in which students are worried about their carrier anymore. Proper guidance should be provided from the teachers during a panic situation to the students through social media.
In any safe way (online classes)
Reduce seminar classes
Syllabus must be less
Online classes
In case of teaching we must move on with technology or else we may get in trouble and education on Mobil or computer must be bought but only for emergency periods and students who are employed
I want classroom revision from 1st module
First of all... the dpts have to provide the syllabus then students can move through it.
Online may be good
Classes should continue after this pandemic.
More online classes must be required
The same old method
Reduce syllabus and complete portions on time
Continuing classes as well as my studying more
Let everything calm down first
Online teaching facilitiesvthat can be accessed through pc,mobile or tablets will be more helpful
