

DEGREE OF M.Sc. Clinical Psychology

MASTER OF SCENCE IN CLINICAL PSYCHOLOGY

(CHOICE BASED CREDIT AND SEMESTER SYSTEM FOR
POSTGRADUATE CURRICULUM)

UNDER THE FACULTY OF SCIENCE

SYLLABUS

(FOR THE STUDENTS ADMITTED FROM THE ACADEMIC YEAR 2019 – '20 ONWARDS)

BOARD OF STUDIES IN CLINICAL PSYCHOLOGY (PG)
CHRIST COLLEGE (AUTONOMOUS), IRINJALAKUDA - 680125, KERALA, INDIA

JUNE, 2020

MEMBERS OF BOARD OF STUDIES

Sl. No	Composition	Name of the Members & Address	Contact Details
1.	Chairman	Dr. Baby Shari P A Professor Department of Psychology Calicut University	9846839369 sharipadiyath@yahoo.com
2	All faculties of the Psychology department of Christ College	1.Ms. Nimy P G 2.Dr. Suresh k Govind 3Ms. Ann Maria Vincent 4.Ms. Renya C V 5.Ms. Betty Paul 6.Ms. Christina Tony 7. Ms. Glossy John 8. Ms. Durga K S	Department of Psychology Christ College Irinjalakuda
3	2 subject experts from outside the Parent University	1. Dr. Varghese Paul Associate Professor, Dept. of Psychology Sahrudaya College, Kodakara 2.Dr. Seena Mathai Assistant Professor Department of Psychology Union Christian College	9995316576 aniljoseps@gmail.com 9961871553 seenamathai@uccollege.edu.in
4	One expert nominated by the Vice Chancellor	1.Dr. Aneesh V Appu Assistant Professor, Dept. of Psychology M G College, Trivandrum 2.Dr. Vijith K Assistant Professor, Dept. of Psychology Government college Mankada, Malappuram 3. Dr. Milu Maria Anto Assistant Professor, Dept. of Psychology Prajothi Niketan College, Pudukkad 4. Nice Mary Francis Assistant Professor, Dept. of Psychology Prajothi Niketan College, Pudukkad 5. Dr, Soumya Mohan Assistant Professor, Dept. of Psychology Shri. C.Achutha Menon Memorial Government College. Thrissur 6. Sukanya B Menon Assistant Professor, Dept. of Psychology Prajothi Niketan College, Pudukad	9847176666 vppsy2003@gmail.com 9349975128, vijith123@gmail.com. 9447250493 miluanto99@gmail.com 9447250493, nicemaryfrancis@gmail.com 9447617498.soumyacapric on@rediffmail.com 9495422530. sukanyabmenon@gmail.com

5.	One representative from the industry	Dr. Salish John Clinical Psychologist, Sacred Heart Mission Hospital, Pullur, Thrissur	9497050607 mail2salish@yahoo.co.in
6	One post graduate meritorious alumnus	Anup Jacob Research Assistant NIMHANS,Bangluru	8113999632 anup_jacob@ymail.com
7	Experts from outside the college for special course	Dr. A.V. Rajesh Principal LBSMHSS Avitathur. HSE Psychology State Coordinator.	9446023878 rajeshwarrier2008@rediffmail.com
8	Other member of the staff in the same faculty	Dr. Davis Antony Mundassery Associate Professor, Department of Statistics, Christ College, Irinjalakuda	9400548166 dmundassery@yahoo.com

Scheme of M Sc. Clinical Psychology

Semester- I

No/Code	Name of the Course	Duration	Credit
CPY1CO1	Psychodynamics and cognition	3	4
CPY1CO2	Personality and Personal Growth	3	4
CPY1CO3	Physiological Psychology	3	4
CPY1CO4	Advanced Social Psychology	3	4
CPY1CO5	Clinical Psychology – 1	3	4
CPY1CO6	Diagnostic Testing - Practicals	3	2
CPY1AO1	Community Extension work		4
Total			22 + 4

Semester- II

No/Code	Name of the Course	Duration	Credit
CPY2CO7	Neuropsychology	3	4
CPY2CO8	Research Methodology	3	4
CPY2CO9	Clinical Psychology-2	3	4
CPY2CO10	Psycho Therapeutics-1	3	4
CPY2CO11	Experimental Psychology- Practicals	3	2
CPY2AO2	Self-Development Techniques		4
Total			18+4

Semester- III

No/Code	Name of the Course	Duration	Credit
CPY3CO12	Counselling Psychology	3	4
CPY3CO13	Psycho Therapeutics-2	3	4
CPY4CO14	Psycho Pathology	3	4
CPY3CO15	Field Experiments	3	2
CPY3CO16	Clinical Practicum	3	2
CP3E-OI	Elective-I	3	4
Total			20

(Note: A student must take one elective from the list of electives)

Electives-I

No/Code	Name of the Course	Duration	Credit
CPY3EO1	Holistic Psychology	3	4
CPY3EO2	Medical Psychology	3	4

Semester-IV

No/Code	Name of the Course	Duration	Credit
CPY3CO17	Current Trends in Psychology	3	4
CPY4E-OII	Elective-II	3	4
CPY4E-OIII	Elective-III	3	4
CPY4CO18	Dissertation & Viva-Voce	3	8
Total			20

(Note: A student must select two courses from the list of electives)

Electives-II

No/Code	Name of the Course	Duration	Credit
CPY4EO3	Clinical Neuropsychology	3	4
CPY4EO4	Industrial Clinical Psychology	3	4
CPY4EO5	Forensic Clinical Psychology	3	4
CPY4EO6	Rehabilitation Psychology	3	4
CPY4EO7	Community and Consulting Psychology	3	2

*There will end semester Internal as well as external examination for all courses except audit courses

SEMESTER I

CPY1C01 – Psychodynamics and Cognition

Number of Credits: 4

Course Outline

UNIT I: Attention and Perception

- What is cognitive psychology and its historical antecedents (Philosophical – Rationalism and Empiricism, Psychological, Cognitive revolution)
- Theoretical approaches to perception: Bottom-up approach (Direct perception, Template and Prototype theory, Feature theory – Pandemonium model, Recognition by Components theory); Top down approach (Navon, Effect of context, Configural- superiority effect); Integration (Computational theory)
- Attention: Selective, Sustained, Divided, and Alternating attention; Selection models of attention (Broadbent model, Triesman model), Capacity model (Kahneman's model), Multiple resource model (Wicken's model)

UNIT II: Learning

- Concept of learning: Reflex, Sequence of behaviour, Habituation
- Classical conditioning: Basic concepts (Acquisition, Extinction, Spontaneous recovery, Disinhibition, Rapid reacquisition, Conditioned inhibition, Generalization, Discrimination); Recent concepts (Blocking effect, Overshadowing, CS pre-exposure effect, Higher order, Sensory pre conditioning, Contributions of McKintosh and Rescorla); Applications
- Operant conditioning: Basic concepts (Schedules of reinforcement, Positive and Negative reinforcement, Punishment, Shaping, Contingencies of reinforcement, Escape and avoidance learning, learned helplessness, Biofeedback); Different concepts of reinforcement (Need reduction, Premacks principle, response deprivation theory); Applications

UNIT III: Memory

- Store models: Atkinson-Shiffrin model (Differential capacity of the stores – Iconic store, Magic number

- 7, Encoding differences of the stores – Acoustic versus Semantic, Retrieval differences of the stores – Serial exhaustive versus Parallel self-terminating, Flow of information and serial position curve)
- Levels of processing model and self-referencing effect
- Nature of memory model (Episodic, Semantic and Procedural memory)
- Working Memory model (As a modification of the store model; Central executive, Phonological loop, Visuo-Spatial sketch pad and Episodic buffer)
- PDP or connectionist model
- Forgetting (Consolidation theory, Interference theory, Decay theory, Discrimination)

UNIT IV: Thinking and Intelligence

- Problem solving: Problem and its type (What is a problem, Well defined and ill-defined problem); Approaches to problem solving (Systematic search versus heuristics, Types of heuristics – Means end analysis, working forward, Working Backward, Generate and test), Problem solving behaviour (Reproductive – Analogy and transfer, Productive - Insight); Obstacles (Mental set or Entrenchment, Functional fixedness, Transfer)
- Decision making: Classical Theory and its critique – Satisficing, Elimination by aspect, naturalistic decision making; Biases and heuristics, Process of group thinking
- Reasoning: Deductive (Conditional – Types or Propositional calculus and Errors, Syllogistic – Linear, Conditional and Errors); Inductive reasoning – (casual inferences, categorical inferences and reasoning by analogy)

CPY1C02 – Personality and Personal Growth

Number of Credits: 4

Course Outline

UNIT I: Concepts and Definitions

The concept of self, personality and identity (Allport, Rogers, Maslow, Skinner and Kohut), Perspectives & notions of personality (Kenneth H. Craik, Robert Hogan And Raymond N.Wolfe); Self, identity and personal growth in psychology (Anand C Paranjpe); Self as an object & as a process.

UNIT II: Self from a Developmental Perspective

Introduction to the ideas of William James, M Lewis (Concepts of “I” & “me”: Categorical Self); Mead, Cooley (Symbolic Interactionism); Robert Kegan (A Constructivist: Developmental approach); Carl Rogers’ Phenomenology; H. Murray, Erick Erickson and Kohlberg’s’ Moral development, Kurt Lewin (Dynamics of Personality).

UNIT III: Significant Contributors to understand of Self

Freud; C Jung; Winnicott; H. Kohut; Eric Fromm; A. Maslow; Rollo May; Viktor Frankel; Martin Seligman; B.F Skinner; Anna Freud; Karen Horney, Allport and Lacan.

UNIT IV: Personal Growth

Historical background of dialectics of self in Eastern Thoughts – Upanishad, Buddhism, Sufism & Integral Perspective.

Historical background of dialectics of self in Western Thoughts – Hume, Kant, Husserl

Culture Self, Enlightenment & Self-realization in Indian Thoughts -Yoga, Bhagavat Gita, Zen and Sufism
Holistic Psychology.

CPY1C03 - Physiological Psychology

Number of Credits: 4

Course Outline

UNIT I: Physiological Psychology of Nervous system

Organization and function of the nervous system- Central nervous system: Brain: cerebral hemisphere (cerebrum), basal ganglia, thalamus, hypothalamus - Brain stem: medulla, pons, midbrain, reticular

formation, cerebellum- Spinal cord: structure and functions, ascending (sensory) tracts, descending (motor) tracts- Cerebrospinal fluid (CSF). Peripheral nervous system: Somatic nervous system- Autonomic nervous system.

UNIT I: Functional System

Limbic system :- Structure and Functions- Septum- Cingulate gyrus- Fornix- Amygdala- Hypocampal formation- Hypothalamus. Higher cortical functions- Functions of neocortex- Structure and functions of cerebral cortex: frontal lobe, temporal lobe, parietal lobe, occipital lobe.

UNIT II: Methods of Neuroanatomical Research

Staining- Scanning- Lesioning- Chemical/electrical stimulation.

UNIT III: Physiological basis of learning and memory

Physiological basis of learning:- Cortex and learning- Hippocampus and learning- The locus of learning- Electrophysiological indices of learning- Neural basis of learning.

Physiological basis of memory:- The consolidation hypothesis- Storage mechanisms- RNA and protein theories.

UNIT IV: Physiological Basis of Emotion and Motivation, and Stress

Central, peripheral and intermediate mechanisms in emotion- Motivation and electric stimulation of brain (ESB)- Categories of stress- Stress and coping strategies- Stress and endocrine system.

UNIT V: Anatomical and Behavioural Asymmetry of the Hemisphere

Split brain models: Cerebral dominance- Levels in consciousness formation and stages of sleep.

CPY1C04 – Advanced Social Psychology

Number of Credits: 4

Course Outline

UNIT 1: Self

Liking and loving-Self fulfilling prophecy- Self Esteem and self efficacy- constructing social reality
Compliance- commitment and Scarcity - Power of the situation- Prosocial behaviour- altruism - situational influences and conformity- Roles and Rules- personal space, territory and crowding.

UNIT 2: Social problems

Child Sexual Abuse- Child physical abuse- Child neglect- child maltreatment- Prevention. Women -Gender and Offending- Theories of victimization- female offenders- Women professionals in the criminal Justice system- offender services Intimate partner violence- Violence in family- domestic violence Rape and sexual assault- POSH at work place- Internal complaints' committee- Human trafficking. Poverty-poverty and national development- planning for poverty reduction in India- socialization of girls- marginalization
Race- class- Gender- Practice of Racism- Institutional Racism – Whiteness- Islamophobia- prerevolutionary background and roots of scientific racism.

UNIT 3: Environmental

Global warming- air pollution-Water contamination- Deforestation. Decreasing biodiversity-wet land loss- Natural disasters. Behaviour as a cause of environmental change- psychological ecology and Ecological Psychology- Noise, weather and climate- pollution and disaster management.

UNIT 4. National and global level

Political Psychology and risks of leadership- Political climate, mood and crisis Psychology of Conflicts and Peace- Obedience to authority- Peace Psychology cooperation, negotiation and policy making.

CPY1C05 – Clinical Psychology - 1

Number of Credits: 4

Course Outline

UNIT I: Introduction

A field of clinical psychology- Historical overview of Clinical Psychology- Clinical Psychology and other areas of psychology- Clinical psychology and other mental health professions-Current issues in Clinical Psychology

UNIT II: Stress Related and Other Adjustment Disorders

Acute stress reaction- Introduction, clinical features and symptoms, etiology, treatment, course and prognosis. Post-traumatic stress disorder- Introduction, clinical features and symptoms, etiology, treatment, course and prognosis. Recovered memories and false memories. Adjustment disorders-: Introduction, clinical features and symptoms, treatment, course and prognosis.

Bereavement: Physical and mental health consequences of bereavement, assessment and management.

UNIT III: Anxiety Disorders

Introduction. Major disorders- Panic disorders, Agoraphobia, Social phobia, Specific phobia, Obsessive-compulsive disorder, Generalized anxiety disorder, Separation anxiety disorder.

Clinical features of anxiety disorders. Psychodynamic aspects of anxiety disorders. Cognitive — Behavioral therapy for anxiety disorders.

UNIT IV: Personality Disorders

Introduction, Classification- Etiology-Paranoid Personality disorder- Schizoid Personality disorder- Schizotypal Personality disorder- Antisocial Personality disorder- Borderline Personality disorder- Histrionic Personality disorder- Narcissistic Personality disorder- Avoidant Personality disorder- Dependent Personality disorder- Obsessive- Compulsive Personality disorder- Personality Disorder Not Otherwise Specified- Personality Change due to a General Medical Condition- Psychobiological Mode of Treatment.

UNIT V: Substance-Related Disorders

Introduction and Overview- Alcohol-related disorders- Amphetamine (or Amphetamine-like)- related disorders- Caffeine-related disorders- Cannabis-related disorders- cocaine-related disorders- Hallucinogen-related disorders- Inhalant- related disorders- Nicotine-related disorders- Opioid-related disorders- Phencyclidine (or phencyclidine-like) -related disorders- Sedative, Hypnotic or Anxiolytic-related disorders- Anabolic-Androgenic Steroid abuse- Other Substance-related Disorders

CPY1C06 – Diagnostic Testing (Practical- 1)

Number of Credits: 2

Course Outline

1. Bender-Gestalt Test (BGT)
2. PGI- Memory Scale
3. Locus of Control
4. Eysenck Personality Questionnaire (EPQ)
5. 16 Personality Factors (16PF)
6. Indian Adaptation of Bells's Adjustment Inventory
7. Test of Creativity
8. Attitude scales
9. Thematic Apperception Test
10. Rorschach Ink Blot Test
11. IAS Rating scale
12. Emotional Maturity Scale
13. Cognitive Distortions
14. Picture Frustration
15. Stroop Color Word Test
16. Maladjustment Scale
17. Coping Scale
18. Depression Scale
19. Social Maturity Scale
20. Draw-a-Man Test

CPY1A01 – Community Extension Work

Number of Credits: 4

Course Outline

This is an audited course and the credit of this course is 4, though it won't be considered for calculating SGPA or CGPA. For MSc Clinical Psychology the suggested course is Community Extension Work. Here the students have to conduct a brief survey to understand the need of Psychological services in their neighboring community. Accordingly, they can design a reach out programme. The plan, design and implementation can be done with the guidance of faculty members, to make sure of ethical standards. The work may be done in holidays and report can be submitted as well as briefly presented in the department. A facilitative discussion can be promoted. End semester exam will be conducted, as viva voce (15 minutes duration) in the department level and the marks can be sent to the university, along with the internal marks of other theory courses. There will not be any external examination for this course.

SEMESTER II

CPY2C07 – Neuropsychology

Number of Credits: 4

Course Outline

UNIT I. Introduction

Historical background of Neuropsychology - Areas of Neuropsychology – Research Studies of the 19 Century - Techniques of Neuropsychological testing.

UNIT II. Anatomical and Functional Organizations

The frontal lobe: Specific functions of frontal lobe, prefrontal/cortex, Broca's area, Orbital center, lateralization in the frontal lobe Intelligence and frontal lobe.

The temporal lobe: Specific functions of temporal lobe; audition, vision, language, attention, memory and personality.

The parietal lobe: specific functions of parietal lobe, somatosensory perceptions, tactile perception and body sense, language and spatial orientation, short-term memory and parietal lobe.

The occipital lobe: Anatomical divisions, basic visual functions and visuo-perceptual functions.

UNIT III: The Limbic System

Hypothalamus: Lateral and ventromedial nucleus-Hunger, thirst, pleasure and reward, and aversion.

Amygdala: Medial and lateral nuclei-Attention, Fear, Rage, Aggression, Emotional language and the

Amygdala, the limbic system and testosterone, sexual orientation and heterosexual device, the homosexual

limbic system.

Hippocampus: Arousal, Attention and Inhibition, Learning and Memory.

UNIT IV: Hemispheric Asymmetry

Individual variation in anatomical asymmetry-Sex differences and Environmental effects. Concept of cerebral dominance: Visual, visuospatial, tactile and auditory perception, language and memory. Agencies of the Corpus Callosum. Functional asymmetry in Normal subjects.

CPY2C08 – Research Methodology

Number of Credits: 4

Course Outline

UNIT 1: Research

Basic concepts-meaning and characteristics of scientific research-factors affecting, steps or stages in research.

Types of Research-Experimental and Non experimental, Laboratory experiments and field experiments, True experiments and quasi experiments, Expost Facto research, Survey research and Types of experiments-Ethical problems in Research.

UNIT 2: Problem, Hypothesis and Variables

Meaning and characteristics of a problem, sources of stating a problem, considerations in selecting the problem, formulation of the problem and types of problems - Meaning and characteristics of a good hypothesis, Types of hypothesis, Errors in Hypothesis testing and formulation of Hypothesis - Meaning and types of variables, Consideration in the selection of variables, Control of extraneous variables-Techniques.

UNIT 3: Review of Literature and Data Collection

Review of literature-Purpose, source and preparation of Index Card.

Data collection-Observation, Interview, Questionnaires and Psychological tests and scales.

UNIT 4: Designs, Analysis and Report Writing

Meaning, purpose and criteria of research design; basic principles in Experimental design- Types and their analysis techniques; Single subject and small N design-Pre, True and Quasi experimental designs and Expost Facto design.

Analysis of data: qualitative and quantitative analysis of the data purpose, conditions and interpretation of major parametric and non-parametric statistical techniques.

General purpose of writing a report, structure and format of a report (API), Style of writing, Typing, evaluating a report and Preparing a research proposal.

Computer Applications, Personal computers, Computer language, Data base, Computer simulations, laboratory experiments using computers.

UNIT 5: Qualitative Research

Principles and Methods – Grounded theory – Thematic Analysis – Narrative approach.

CPY2C09 – Clinical Psychology - 2

Number of Credits: 4

Course Outline

Unit I : Cognitive and affective Disorders

- (A) Schizophrenia Spectrum and other Psychotic disorders: Clinical Features: Signs and Symptoms, Types, Differential diagnosis Epidemiology - Etiology: Genetic Factors- Structural Abnormalities- Biochemical - Factors, - Classical Psychoanalytic model and other Psychodynamic theories - Family Dynamics and Interaction models - Stress- Diathesis model - Interpersonal Functioning: Interpersonal Stress, Interpersonal Adjustment, Role of Cognition in Interpersonal Dysfunction.
- (B) Mood Disorders: Clinical Features of Bipolar disorders – Depressive disorders – Schizotypal Disorders – Delusional disorders-Schizoaffective disorders : Signs and Symptoms, Types, differential diagnosis – Epidemiology - Etiology: Genetics – Neurobiology - Psychodynamic Theories - Theories of Depression: Life Events Model - Lewinson's Behavioral and Integrative Models - Coyne's - Interpersonal Model - Information Processing Models - Beck's Cognitive Theory - Learned Helplessness.

Unit II : Other disorders

- A) Eating disorder - Clinical Description - Types: Anorexia nervosa and bulimia nervosa – Pica - Etiology

- Treatment

- B) Gender Dysphoria – Gender dysphoria in children
- C) Tic Disorders
Clinical picture - Types: Chronic motor, Vocal
- D) Speech Disorders
Clinical features – Types – Etiology – Treatment
- E) Dissociative Disorders – Somatic symptoms and related disorders,

Unit III: Developmental Disabilities

- A) Intellectual Disability
Definition - Level of Mental Retardation – Epidemiology – Etiology - Prevention
- B) Learning Disorders
Definition - Types: Reading, Writing and Mathematics disorders
- C) Motor disorder & Communication Disorders
Definition types – Epidemiology - Etiology
- D) Pervasive Developmental disorders
Definition - Types: Autism, Asperger's, Rett's – Epidemiology - Etiology
- E) Attention Deficit Hyperactivity disorder
Clinical features – Epidemiology – Etiology

Unit IV: Diagnosis and classification

Normal Mental Health - Definition of Psychiatric Disorder-Psychiatric History and Examination. Interview Technique: Identification data – Informants - Chief Complaints - History of Present Illness - Past Psychiatric and Medical History - Treatment History - Family History - Present History - Premorbid Personality Mental Status Examination: General Appearance and Behaviour - Speech-Rate, Volume, Tone, Flow - Mood And Affect – Quality, Reactivity, Persistence - Thought-Stream and Form of thought - Content of Thought - Perception: - Hallucinations - Illusions and Misinterpretations - Depersonalization/Derealization - Cognition: Orientation – Attention – Concentration – Memory – Intelligence - Abstract Thinking – Insight – Judgment- Classification according to: ICD 10 – Changes from DSM IV to DSM V – Multiaxial Classification – DSM V

CPY2C010 – Psychotherapeutics - 1

Number of Credits: 4

Course Outline

UNIT I Introduction to psychotherapy

Definition- Essential process in psychotherapy- Types of psychotherapy- Phases in psychotherapy. Goals of psychotherapy. Basic ingredients of psychotherapy.

UNIT II Psychoanalysis

Basic concepts- Mechanism of psychotherapy- Opening phase- Development of transference- Working through- Resolution of transference. Brief Dynamic Therapy

UNIT III Behavior therapy

Basic concepts- Process- Establishing a working relationship- Functional analysis- How to select a target behavior- Stages of therapy- Modification process.

UNIT IV Third Force Therapies

Cognitive, Humanistic, Existential therapies: Cognitive view of psychopathology- Clinical assessment- Process of Cognitive therapy

Rational Emotive Behavior Therapy- Cognitive Behavior Therapy- Stress Inoculation Client-centered therapy- Logotherapy

New wave therapies – Mindfulness based Therapies, Acceptance and Commitment Therapy.

UNIT V Specific Therapies

Therapy for interpersonal relationships: Family therapy- Group therapy- Grief therapy- Psychodrama.

CPY2C011 – Experimental Psychology – Practicals

Number of Credits: 2

Course Outline

1. Colored Progressive matrices
2. Standard Progressive matrices
3. Advanced Progressive Matrices
4. WAPIS
5. Mathew's Test of Mental Abilities
6. Group Embedded Figure Test
7. Draw a Man Test
8. Weschler's Intelligence Scale for Children IV (Indian Version)
9. Vineland Adaptive Behavior Scales
10. NIMHANS Battery for Neuropsychology (For children)
11. Dyslexia Screening Test
12. Wisconsin Card Sorting Test
13. Weschler Memory Scale
14. EVAT-Benzen's Visusal Attention Test
15. LNNB- Luria Nembraska Neuro Psychological Battery
16. Childhood Behavior Checklist.
17. NIMHANS Index for Learning Disability.
18. Indian Scale for Assessment of Autism.
19. Rey-Osterrich Neuropsychological Test.
20. Conner's Rating Scale for ADHD.

CPY2A02 – Self Development Techniques

Number of Credits: 4

Course Outline

1. Techniques of Meditation.
Transcendental Meditation
Yogic Meditation
2. Relaxation
Yoga nidra
Yoga (Patajali)
Deep breathing relaxation exercise.
Jacobsons progressive Relaxation
Hypnosis induced Relaxation.
3. Bio-feed back training

E M G

G S R

4. Self awareness through
 - Social Skill Development
 - Stress management Techniques.
 - Counseling skills.
5. Mindfulness based techniques
 - Body scanning
 - Mindfulness sitting Meditation
 - Mindful activities

SEMESTER III

CPY3C012 – Counselling Psychology

Number of Credits: 4

Course Outline

UNIT 1. Introduction to Counselling

Definition- Distinction Between Counselling and Psychotherapy -Goals of counseling - Historical and Professional Foundations of Counselling - Counselling process and methods – Characteristics of a helping relationship- Characteristics of an Effective Counselling relationships.

UNIT 2. Counselling Procedures/Skills

Initial procedures, the initial counseling Interview, and counselling skills. Counselling Procedures/Skill-II: Advanced Empathy, self-disclosure and Interpretation; Action strategies: Role playing, Behavioural techniques, Decision-making Methodologies and problem – solving strategies.

UNIT 3. Counselling Process and Theories

Building counseling relationships – Working in a counseling relationship – Termination of counseling relationships – Behavioral – Cognitive – Client Centered – existential and eclectic approaches.

UNIT 4. Counselling in Diverse Populations and Specialties

Counselling Aged Populations – Gender based counseling – Counselling and spirituality. Career counseling – Marriage, couple and family counseling- Professional School counseling – Abuse, Disability and community Counselling. Principles and procedures of Group counseling.

UNIT 5. Training and Research in Counselling Psychology

Role of relaxation in counseling- Guided Somato psychic Relaxation (GSPR) - Jacobson's Progressive

Muscular Relaxation. - Yoga relaxation - EEG, EMG, Bio- feedback relaxation - Transcendental Meditation: Research and Evaluation: Testing, assessment and diagnosis Professional Issues in counseling- Evaluation of counseling- purpose, Difficulties and criteria - Ethical and Legal Aspects of counselling.

CPY3C013 – Psychotherapeutics - 2

Number of Credits: 4

Course Outline

Unit I Behavior Modification-I

Classical, Operant and Vicarious Conditioning.

Behavior modification techniques: Desensitization and Extinction procedures- In-vivo and in-vitro- Graded Exposure - Flooding and Implosion- Response Prevention.

Unit II Behavior Modification-II

Operant Procedures: Token economy- Contingency Management- Social Skills Training: Assertiveness training- Modeling- Aversion Therapy: Chemical Aversion and Verbal Aversion

Unit III Relaxation, Meditation and Biofeedback

Relaxation Techniques: Jacobson's Progressive Muscle Relaxation- Breathing exercise- Meditation- Biofeedback techniques

Unit IV Therapies in Practice

Crisis intervention therapy- Marital therapy- Interpersonal therapy (IPT)- Dialectical Behavior Therapy- Basic principles

Ethical issues in psychotherapy

CPY3C014 – Psychopathology

Number of Credits: 4

Course Outline

Unit II: Introduction

Disorders of perception- Sensory distortion, Changes in intensities, Changes in quality, Changes in spatial form- Sensory deceptions- Illusions, Hallucinations, Causes of hallucinations, Hallucinations of individual senses, Spatial kinds of hallucination, The features of organic hallucinations. Hallucinatory syndromes- Disorders of the experience of time.

Unit II: Disorders of Thought and speech

Disorders of the stream of thought- Disorders of tempo- Disorders of the continuity of thinking- Disorders of the possession of thought- Obsessions and compulsions, Thought alienation. Disorders of the content of thinking- Primary Delusions, Secondary delusions and systematization, The content of delusions, The reality of Delusions. Disorders of the form of thinking. Speech disorders- speech disorders which are mainly functional, Aphasia.

Unit III: Disorders of memory and emotion

The Amnesias- Psychogenic amnesia, Organic amnesias. Distortion of memories- disorders of recall, disorders of recognition. The classification of emotional disorders- Abnormal emotional predispositions, Abnormal emotional reactions, abnormal expressions of emotion, Morbid disorders of emotion, Morbid disorders of the expression of emotion.

Unit IV: Disorders of the experience of the self and consciousness

Disturbance of awareness of self activity- Disturbances of the continuity of self disturbance of the boundaries of the self. Disorders of consciousness- Dream-like changes of consciousness- Lowering of consciousness- Restriction of consciousness.

Unit V: Motor disorders

The alienation of motor acts- The classification of motor disorders- Disorders of adaptive movements, non-adaptive movements, Motor speech disturbances in mental disorders, Disorders of posture, abnormal complex patterns of behavior.

CPY3C015 – Field Experiments

Number of Credits: 2

Course Outline

During the third semester, students have to conduct field experiments in clinical psychology namely, systematic observation, Interview, Content Analysis, Case studies and Text construction. Though this provides practical application of their understanding in scientific methodology, it includes specific objectives like conducting observation among clients background collecting and analyzing data from a wide range of sample, systematically planning their research methodology, developing skills needed to be an interviewer or trainer of interviewers, Analyzing a descriptive data, conducting various kinds of case studies and case analysis and developing and standardization of tests, questionnaires and inventories. All the above field works have to be done by the students individually except test construction under the guidance of respective faculty members.

a) Systematic Observation

In this the students have to conduct a minor study in which systematic observation should be adopted as the method of data collection. The samples are of the behavioural variables have to be observed by the student and the data be discussed. The Method of observation, and its practical application among the sample have to be studied to develop a skill in scientific observation.

b) Interview

A psychologist should possess skill in interviewing. In this field experiment, the student have to conduct a minor level study in which interview should be adopted as the method of data collection. Any of the relevant behavioral variables have to be studied through this method. Different kinds of interview, its practical applications etc. should be known to the student along with their skill development in interviewing and to be a trainer of interviewing.

c) Content Analysis

In this, students should develop a skill in analyzing content of data collected. For this the students have to practical sessions of analyzing contents of written, printed, vocal, or picturized data. A minor level study can be planned with this purpose and analysis can be conducted. This can be with a purpose of identifying a particular psychological factor/variable or with a general analysis aim.

d) Case studies

Different kinds of cases: Five clinical cases in different disorders can be studied by the student, with a thorough analysis of the background precipitating factors, on set treatments undergone, consequences and efficiency, follow up and rehabilitation procedures. The cases can be collected from the consultancy services available in the department, nearby mental health care institutions, organizations, etc.

e) Test Construction

This is a group work. The student group have to develop a test in Psychology and standardize will the help of a supervising teacher. The selection of the variable can be according to the areas of interest of the teacher and the students.

All the field experiments have to be presented in the class and it has to be submitted as a written record to the Head of the Department, in double copy, before 3rd semester written examination. One copy will be returned to the student after valuation, whereas the other copy will be retained in the department library, as the academic work conducted there. [Students can publish the study with the guide, if necessary, when the course is over]

f) Bio-feedback

Conduct and report the experiment with application in clinical psychology.

CPY3C016 – Clinical Praticum

Number of Credits: 2

Course Outline

Students are expected to visit any organization that apply Psychology in practice in any of one month (60 days time with minimum 30 day's full-time attendance) during the 2 moths summer vacation. There the student has to study under the supervision of a guide there to understand and develop skill in the application of psychological principles in the organization. It can be anywhere in or out side India, where the student has to bring a written report about the functioning of the organization, objectives, vision/mission and the experience during internship to develop their understanding and skills in the tenure. The internship can be done through day visits, postings or residential mode, as per the strategy of the organization. The supervisor from the organization has to see the report prepared and attest, but no valuation of performance is being done whereas the report will be assessed by the external expert during the viva-voce in connection

with the practical examination of the journal work, field experimental methods (Practical III). It is advisable to be a supervising guide from the organization with master's degree, M. Phil/PD in Psychology, or related fields.

CPY3E01 – Holistic Psychology

Number of Credits: 4

Course Outline

UNIT I

Introduction to an Indian and Western approach in Holistic Clinical Psychology:

The notions of: a. Indian (Eastern) approach; b. Western approach; c. East-West approach; d. Holistic Psychology; e. Clinical Psychology.

Rationale and purpose of a combined East-West approach in Clinical Psychology. Some factors contributing towards a combined East-West approach.

UNIT II

Introduction to Western approach in Psychotherapy. The aim of Western Psychotherapies. The notions of Holistic Clinical Psychology from: a. Humanistic: b. Existential: c. phenomenological perspectives. The limitations of Western Psychotherapies.

UNIT III

Classification of Yoga in general. Classification of Patanjali Yoga or Ashtanga Yoga or Raja Yoga. The meaning of Patanjali Yoga according to Patanjali and Vyasa. The aim of Patanjali Yoga as defined by Patanjali and Vyasa. The eight steps in Patanjali Yoga. The therapeutic value of Patanjali Yoga. Yoga Psychology. Yoga theory of personality. Yoga theory of Psychopathology. Yoga stages and levels of consciousness in theory and practice. Limitations of Yoga.

UNIT IV

Psychotherapy in India; the feature of Psychotherapy in India; Indian (Eastern) cultural values and the therapeutic approach in India or Clinical psychology as applied to Indian people within Indian cultural values; the techniques and process of therapy in an East-West approach as complementary; its implications in Holistic Clinical Psychology.

UNIT V

Alternate eastern therapeutic approaches in Holistic Clinical Psychology: a. Yoga breathing for relaxation and therapeutic purpose; b. Yoga Meditations for deeper insight for therapeutic purpose through levels of consciousness change; c. Reiki; d. Pranic healing; e. Zen; f. Sufi; etc.

CPY3E02 – Medical Psychology

Number of Credits: 4

Course Outline

UNIT I. Hospital Setting

1. Emotional Adjustment During Hospitalization.
2. Role of Psychologist in Hospitals.
3. Patient Practitioner Relationship.
4. Health and Behaviour.

UNIT II. Stress, Psychosocial factors and Illness

- a) Stress and Health.
- b) Psycho physiological disorders.
- c) Cardiovascular Diseases cancer.
- d) Stress and cancer.

UNIT III. Coping with high mortality Illness

- a) Behavioural Causes.
- b) Coping, High mortality Illness.
- c) Terminal Illness & Quality of Life.
- d) Accidents Victims

UNIT IV. Mental Health Promotion Programmes

- a) Promoting Health in Organization.
- b) Community wide wellness Programmes.
- c) Meditation and Relaxation Techniques.
- d) Stress Management Techniques.

SEMESTER IV

CPY4C017 – Current Trends in Psychology

Number of Credits: 4

Course Outline

UNIT .1 Environmental Psychology and tourism

Climate and behaviour- Impact of natural catastrophes- tourism Pollution and mental health Society and mental health, Legal focus on abuse and victimization-intervention.

UNIT. II Population Psychology

Family size, Population and behaviour, Feminism, Female infanticide, Ecology and Ethology.

UNIT.III Political Behaviour

Nature, Scope, Development of political behaviour and personality, Impact of war, riots, terrorism etc.

UNIT. IV Cognitive Engineering and Information Technology

Cognitive Psychology and its Principles, Artificial Intelligence-Goals of Artificial Intelligence, Fundamentals of Informational technology, Computer based information System, Its application in psychology.

- Use of personal computers and computers assisted decision making, Psychological consequences.

CPY4E03 – Clinical NeuroPsychology

Number of Credits: 4

Course Outline

UNIT.1. Introduction

The Brian Hypothesis - The Neuron Hypothesis- Modern Development

Methods and Concepts – The Black Box approach; Ablation; Stimulation; Neurochemical Manipulations;

Electro physiological studies; and Interpretation and Conceptual analysis.

UNIT.2. Brain Damage and Functional Impairment

Aphasia – Classification, Examination, Varieties of Aphasias and their location; Disturbance of single language modality.

Alexia-Classification, Syndromes of alexia, assessment, treatment and prognosis.

Agraphia - Classification, Assessment, Relationship of Linguistic and Motor a graphics to other neuropsychological disorders.

Acalculia – Varieties of acalculia, localization of acalculias, hemisphereic specialization for calculation; Developmental Dyscalculis – clinical assessment and recent formulation of calculation disorder.

Body Scheme Disturbances- a. Finger Agnosia – Developmental aspects, Behavioural correlates, Anatomical correlates, Finger agnosia and reading disability. b. Right – Left Disorientation – Developmental aspects, Basis of right – left orientation, impairment in patient with brain disease.

Apraxia – Definition, Examining and testing varieties of apraxia, Neuropathology, Treatment and Recovery.

Visuo Perceptual, Visuo spatial and Visuo constructive disorders – Visual analysis and synthesis

Agnosia - Nature of recognition, Visual agnosia, Auditory Agnosia, Somato sensory agnosia.

Neglect and related disorders – Definition, Testing for neglect and related disorders.

Emotional disorders associated with neurological disease – Hemispheric Dysfunction, limbic system, Dysfunction, basal ganglia disorders.

Amnesia Disorders - General symptoms of permanent amnesia, Amnesia following bilateral lesion, Anterograde amnesia.

UNIT.3. Disconnection syndromes

The Behavioural effects of disconnection Hemispheric disconnection systems.

Lesion effects reinterpreted as disconnection syndromes. Experimental verification of disconnection effects.

UNIT.4. Neurological Examination and Assessment

Objectives and approaches of Neurological assessment.

Neuropsychological examination – Computer based assessment, radiological imaging and electrical investigations.

Assessment of intelligence and cognitive abilities, deficits in visual function, sensory motor impairment, visuo perceptual impairment, impaired language written, memory etc.

CPY4E04 – Industrial Clinical Psychology

Number of Credits: 4

Course Outline

UNIT I: Introduction

- a) Industrial clinical psychology-Model, Control, Causes, Treatment and correction action.
- b) Mental Health in the workplace: Toward an integration of organisational and Clinical Theory.
- c) Mental Health and Disabilities, the Employer and the law.

UNIT II: Stress and Work

- a) Models of work stress.
- b) Effects of job stress on Mental and Physical Health.
- c) The Unbalanced Life: Work and family conflict.
- d) Safety and Health.
- e) Maintaining a healthy work environment.
- f) Occupational Hazards and risks.
- g) Accident process.
- h) Intervention in Occupational Stress.

UNIT III: Effect of Psychopathology on Work

- a) Depression in the work place.
- b) Bipolar disorders.
- c) Generalized Anxiety disorder.
- d) Social anxiety disorder, specific phobias and panic order.
- e) PTSD in the workplace.
- f) Setrizophrensis.
- g) Anti-social personality disorder.
- h) Borderline personality disorder.
- i) Eating disorders.
- j) Traumatic Brian Injury in the workplace.
- k) Insomnia.

UNIT IV: Disruptive Behaviour at Work

- a) Alcohol and Drug.
- b) Social Dysfunction.

- c) Anger, Hostility and Violence.
- d) Harassment and discrimination.
- e) Absenteeism.
- f) Passive-Aggressive Behaviour.

UNIT V: Special Groups in Organisational Counselling

- a) Chronic absentees.
- b) Accident proneness.
- c) Employee with family problems.
- d) Employees with alcoholism and drug addiction.
- e) Maladjusted employees.
- f) Counseling the indisciplined.
- g) Setting up of counselling cell in organization.

UNIT VI: Relaxation Techniques In I/C Setting

- a) Theoretical background.
- b) General aspects of relaxation Training.
- c) Physical methods of relaxation-progressive relaxation, progressive relaxation training, A tense- release script, passive Muscular relaxation, applied relaxation, Behavioural relaxation training, The Mitchell method, The Alexander methods, differential relaxation, stretchings, physical exercise, Breathing.
- d) Mental approaches to relaxation – self-awareness, Imagery, Goal-directed visualization, Autogenic training, Meditation, The relaxation response.
- e) Miscellaneous topics - ‘On-the-spot’ techniques, Assessment and research.

Number of Credits: 4

Course Outline

UNIT I: Introduction

Violent Offenders-Sexual Offenders-Crime and Psychopathology. Is crime a disorder. Social Problem solving and offending –evidence, evaluation and evolution.

UNIT II: Assessment and classification

Women offender-sex offenders-violent offender- offender with developmental disabilities and personality disorders.

UNIT III: Treatment Offenders

women-violent sexual-aggressive – group – fire setters – drug – Developmental disabilities.

UNIT IV: Offending Behaviour

Programmes – Aggressive replacement training; Motivating Offenders to change, Aggression control training; Relaxation techniques, and Offender Rehabilitation.

Number of Credits: 4

Course Outline

Unit 1: Rehabilitation psychology an overview Concept of Rehabilitation Psychology

Definition - Historical perspective - Scope and methods - Functions

Psychological Approach to Rehabilitation Assessment – Diagnosis – Treatment - Certification Work settings of rehabilitation psychologists

Understanding psychological needs of caregivers and working with families of persons with disabilities.

Designing training programmes for rehabilitation psychologists - Training need analysis, implementation of training programmes

Research in rehabilitation

Introduction to Research Methodology - Hypothesis, Sampling and Research Design - Statistical Techniques of Data Analysis

Recent trends in research in rehabilitation psychology

Unit 2: Concept of Disability and Rehabilitation

Concept of disability rehabilitation, Evolution of rehabilitation, Paradigm shift in rehabilitation

Definition of disability and concept of impairment, disability and handicap Nature and Need of Various Disabilities-

Paediatric rehabilitation psychology - (Mental Retardation, Low Vision and Blindness, Hearing and Speech Disability, Orthopedic Neuromuscular Disability, Cerebral Palsy and Multiple Disabilities, Autism Spectrum Disorder Learning Disability, ADHD/ADD) - Psychological aspects of cardiac rehabilitation - Rehabilitation psychology for mental disorders - Rehabilitation psychology for personality disorders - Psychological factors in sport injury rehabilitation - Neuropsychological Rehabilitation –

Government schemes and policies

Legislations, Government Policies & Schemes for Persons with Disabilities - Mental Health Act - Persons with Disabilities Act, National Trust Act - Rehabilitation Council of India Act – UNCRPD

Unit 3: Different models of rehabilitation

Biology Model - Medical-Model of Rehabilitation - Psychological Model - Socio-cultural Model - Role of Parents and Family in Disability Rehabilitation

Community Based Rehabilitation - Definition and Principles of Community Based Rehabilitation - Community Awareness and Participation - Community Based Rehabilitation - Independent Living Institutional Model

Unit 4: Psychological rehabilitation and intervention

Psychological Intervention - Definition and basic principles of psychological intervention - Concept and

Definition of Psychotherapy - Individual Therapy and Group Therapy

Types of Interventions - Psycho analytic therapy - Client-centred therapy - Behaviour therapy - Cognitive Behaviour therapy - Rational – Emotive therapy - Supportive therapy
 - Augmentative therapy - Relaxation techniques
 Psychological Counselling - Concept, Definition and process of Counselling - Characteristics of a good Counsellor - Counselling Skills - Types of Counselling
 Ethical issues in Rehabilitation Counselling
