---

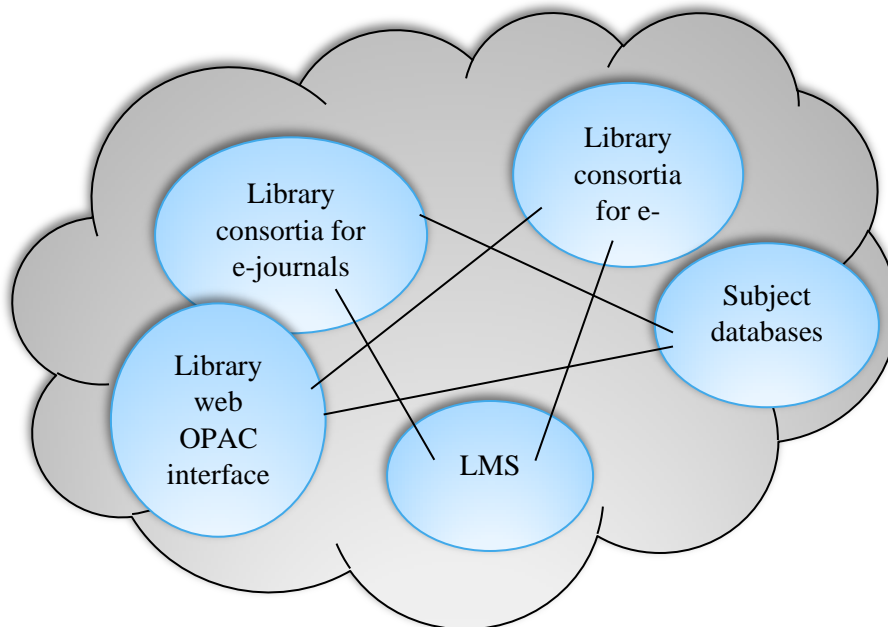

*CLOUD COMPUTING*

---

**C**loud Computing is internet-based computing where virtual shared servers provide software, infrastructure, platform devices and other resources and hosting to customers on a pay-as-you-use basis.

All information that a digitized system has to offer is provided as a service in the cloud computing model. Users can access these services available on the “Internet Cloud” without having any previous know-how on managing the resources involved

**Library services integration in Cloud computing**

### Important Layers of Cloud Computing

- ❖ **SaaS:** Software as a service (Example: E-mails, CRM, ILS, Google Docs, etc.)
- ❖ **PaaS:** Platform as a service (Example: Application Development)
- ❖ **IaaS:** Infrastructure as a service (Example: Network, Data storage, Hosting, etc.)
