**FRUITS & VEGITABLES PRIORITY LIST**

AQAR 2021-22

### 3.6.3 & 3.6.4 Extension activities

- Trainee learnt about the process of farming which is followed from very ancient times.
- Trainee learnt the culture of the pokkali farming and the benefits of pokkali rice
- Trainee learnt about the fish farming in half season and pokkali farming in half season from April onwards.
- Trainee learnt how the farmers are struggling in the field where they are not getting proper income has per expense
- Trainee learnt about the organic fertilizer used for the cultivation ,bowing the environment.
- Trainee learnt about the needs and objectives of the community by the interaction
  
- Less ratio of cultivation of pokkali comparing to the last year's
- Padasekhara samiti is not functioning properly
- Farmers are not getting the original pokkali seeds for cultivation whereas they are getting vitila -6 or vitila -10 instead.
- Landhold issues faced by farmers
- Manpower working very expensive (labours)
- Farmers are facing many problems such as high salinity content in land, as disaster flood, attack of pest, quality less seeds, etc
- Government is trying to uplift the cultivation but it's implementation is not at proper level.
