

ENTE MAAV, ENTAE SWANTHAM NAATUMAAVE

'Ente Maav, Entae Swantham Naatumaave' is a social forestry program of Christ College (Autonomous), irinjalakkuda, which happened to be the brain child of Fr. Joy Peenikaparambil CMI. Other participants of this initiative are Bio Diversity Club, NSS, NCC, BPE Dept., Thavanish, and Bhoomithra Sena. The main aim of this project is to propagate the use of native fruits among the student community and also the local regions. So far, we have distributed saplings to many regional institutions, and also, we have moulded a custom of inspiring the younger generation by making every chief guest arriving at the campus to plant a mango sapling. Across various times, we have planted a total of 21, 451 saplings.
