

## RAIN WATER HARVESTING

It is another great initiative undertaken by the college which contributes to the conservation of one of the most important natural resources, i.e., water. Rain water is collected and stored in a huge reservoir during the monsoon, and is used for various purposes in the college. Our college's main water resource is this reservoir. It is green initiative of Christ college which store huge amount of rain water which falls on the roofs of college building and stored in a huge tank.
