CHRIST COLLEGE (AUTONOMOUS), IRINJALAKUDA

DEGREE OF B. Sc. FT

BACHELOR OF SCIENCE IN FOOD TECHNOLOGY

(CHOICE BASED CREDIT AND SEMESTER SYSTEM FOR UNDERGRADUATE CURRICULUM)

UNDER THE FACULTY OF FOOD TECHNOLOGY

SYLLABUS

(FOR THE STUDENTS ADMITTED FROM THE ACADEMIC YEAR 2019 – '20 ONWARDS)

BOARD OF STUDIES IN FOOD TECHNOLOGY (UG)

CHRIST COLLEGE (AUTONOMOUS), IRINJALAKUDA - 680125, KERALA, INDIA

JUNE, 2019

LIST OF MEMBERS IN BOARD OF STUDIES

CHAIRPERSON	Mrs. Ambily. K. M Course coordinator, B.sc Food Technology, Christ college IJK
UNIVERSITY NOMINEE	Dr. Pushpalatha Professor & Head Banana Research station KAU, Kannara, Thrissur
SUBJECT EXPERT	Mrs. Cibiya George Head, Department of Food Technology DGM MES Mampad College Malappuram Dist. Mrs. Bhavya Head, Department of BVOC Food Processing ST. Teresa's college, Ernakulam
INDUSTRY REPRESENTATIVE	Mrs. Sheila. P. Methil Food Technology consultant & Trainer, Farm to Fork centre, Changampuzha park, Edappilly, Kochi.
MEMBERS	 Ms. Lulu Varghese Assistant Professor Department of vocational studies Christ College (Autonomous) Irinjalakuda Ms. Teenu Thomas Assistant Professor Department of vocational studies Christ College (Autonomous) Irinjalakuda Mr. Binu George Assistant Professor Department of Food Technology Christ College (Autonomous) Irinjalakuda Mrs. Sophia Rachel Kurian Assistant Professor Department of Food Technology Christ College (Autonomous) Irinjalakuda

ABOUT THE COURSE

B. Sc Food Technology is a 3-year science course for the students who have a scientific bend and wish to work and research on food. The course consists of 3 years that is divided into 6 semesters to make the concepts easily understandable. The main target for food technologists is to improvise the food quality, making sure food lasts longer than usual, using fewer food items to get more quantity, creating disease-resistant food items, etc.

Food Technology deals with a blend of physical, chemical or microbiological techniques and processes for transforming raw ingredients into food and also other forms in food processing industry. Food technologists work in food industries and food processing organizations to process, preserve, package and labelling food and food items. Research teams under food technology use scientific means such as DNA technology, gene editing to edit genomes of the food items to improve its quality.

PROGRAMME SPECIFIC OUTCOME

Bachelor of science, Food Technology		CCASFT			
	Understand the depth of knowle	edge in different topics of Food			
PSO1	Technology				
7000	Apply theoretical knowledge of	f principles and concepts of			
PSO2	innovative ideas in practical pro	oblems of Food industry			
200	Identify the area of their interes	et in academics and in research			
PSO3	and development				
	Continue advanced study in var	rious fields like cereals, dairy,			
PSO4	alcohol, sugar, bakery and cont	fectionery, fruits, vegetables,			
	oiland oil seed processing, meat and fish				
	Understanding concepts such	as the composition of food,			
PSO5	developin candidates an understanding of foods nutritional,				
	physicochemical and microbial properties				
	Provide students an advanced in	nsight to different techniques			
	related to food preservation and	d food processing and also to			
PSO6	teachstudents concept such as the	ne importance of food quality,			
	plant sanitation, food laws and	regulations and packaging in			
	food industry				
	Begin an employment in various	s fields like science, education,			
PSO7	hotel, hospitals, food industries, laboratories, quality testing				
	organisations, entrepreneur, research etc.				

B.SC FOOD TECHNOLOGY DEGREE PROGRAMME-LRP (LANGUAGE REDUCED PATTERN)

The basic Degree programme means the entire course study and examinations for the award of degree. The duration of BSc Food Technology under graduate programme shall be of 6semesters distributed over a period of 3 years. A sequence of 18 academic weeks with a unit of five working days constitute one semester. Course means a segment of subject matter to be covered in a semester (traditionally referred to as a paper). BSc Food Technology degree programme is a language reduced pattern has common courses of compulsory English and additional languages in 1st and 2nd semester which is taught by language teachers. Those are common English course I, common English course II, common English course III, common English4IV. Additional language course I and additional language course II. It may be Hindi, Arabic or Malayalam. Additional language may be chosen by students according to their wish. General course 1,2,3,4 are with a code of A which may be taught by either parent department. Complimentary courses refer to course related to core course of BSc Food Technology degree programme which has physics and chemistry and are distributed in first four semesters. Food science & Quality control is chosen as complimentary course for B.Sc Chemistry programme with a code of C and finally open course which is taught to the students of other than B. Sc. Food Technology degree programme from parent department. There are 3open courses, of which is taught to the students of other than BSc. Food Technology degree programme from parent department. There are 3 open courses of which one course will be selected by student at his / her choice and will be studied in fifth semester with a code of D. Audit courses are mandatory for the completion of the programme but credits will not be counted. Audit courses are mandatory for the completion of the programme but credits will not be counted for the calculation of SGPA or CGPA. There shall be one audit course in each first four semesters. Audit courses material may be getting from MOOC, SWAYAM or any other online platform and students can also attain these credits from anyone of the above said online platform (which is optional). Audit course code is E. Audit courses examination will be conducted by college itself from the pool of questions which is supplied from university. The college should send the list of passed students to the university at least before commencement of fifth semester examination. List of courses I each semester with credits are given below.

Sl. No.	Name of the course	Credits	Semester
1	Environment Studies	4	1
2	Disaster Management	4	2
3	Human Rights/Intellectual property Rights/Consumer	4	3
	Protection		
4	Gender Studies/Gerontology	4	4

Credits means a unit of academic input measured in terms of weekly contact hours/course contents assigned to a course. Each course shall have certain credits. For passing the degree programme the student shall be required to achieve a minimum of 120 credits of which 38 credits shall be from common courses (14 credits for common English courses, 8 credits for Additional language courses and 16 credits for General Courses.) 56 credits from core, complimentary(24 credits) and 3 credits from open course. Students of BSc Food Technology should undergo a project work for a period of 15 days during 5th or 6th semester which is done as 'In plant Training'.

Credit Distribution of B.Sc. Food Technology Programme

Examinations

There shall be University Examinations at the end of semester. A student shall be permitted to appear for the semester examination, only if he or she secures not less than 75% attendance in each semester. Practical Examination shall be conducted by the University at the end of 4th & 6th semester

Evaluation and Grading

Mark system is followed instead of direct grading for each question. After external and internal evaluations marks are entered in the answer scripts. All other calculations, including grading, will be done by the university using the software. Indirect Grading System in 10point scale is followed. Each course is evaluated by assigning marks with a letter grade (O, A+, A, B+, B, C, P, F, I & Ab) to that course by the method of indirect grading.

Ten Point Indirect Grading System

			Grade Point	Range of	
% of Marks (Both Internal & external put together)	Grade	Interpretation	Average	Grade point	Class
95 and above	О	Outstanding	10	9.5 - 10	First Class with
85 to below 95	A^{+}	Excellent	9	8.5 - 9.49	distinction
75 to below 85	A	Very good	8	7.5 – 8.49	
65 to below 75	B^{+}	Good	7	6.5 – 7.49	
55 to below 65	В	Satisfactory	6	5.5 – 6.49	First Class
45 to below 55	С	Average	5	4.5 - 5.49	Second Class
35 to below 45	P	Pass	4	3.5 - 4.49	Third class
Below 35	F	Failure	0	0	Fail
Incomplete	I	Incomplete	0	0	Fail
Absent	Ab	Absent	0	0	Fail

Course Evaluation

The evaluation Scheme for each course shall contain two parts. They are

1) External Evaluation 2) Internal Evaluation

External Evaluation

External evaluation carries 80% marks. University examinations will be conducted at the end of each semester. The external question papers may be of uniform pattern with 80/60 marks the courses with 2/3 credits will have an external examination of 2hour duration of 60 marks and courses with 4/5 credits will have an external examination of 2.5 hours duration of 80 marks.

Theory Question Paper pattern (for 60 marks/1 to 3 Credits)

Duration	Pattern	No. of Questions	Marks	Ceiling of Marks
	Short answer	12	2	20
2 Hours	Paragraph	7	5	30
	Essay	2	1x10	10
Total Mar	ks		60	

Theory Question Paper pattern (for 80 marks/4 to 5 Credits)

Duration	Pattern	No. of Questions	Marks	Ceiling of Marks
	Short answer	15	2	25
2.5 Hours	Paragraph	8	5	35
	Essay	4	2x10	20
Total Mark	S			80

Practical Examination

The external examination in practical courses shall be conducted by two examiners appointed by the University. The project evaluation can be conducted by external examiner only. Food Processing & Preservation (FTL3B06P), Food Chemistry & Analytical Instrumentation (FTL4B08P) courses practical examination will be combined, the course code stands FTL4B08P(Credits 3) and conducted at the end of second year, similarly Cereals, Pulses and Oilseeds Technology (FTL5B12P)and Technology of Fruit, Vegetables, Spices & Plantation crops (FTL6B19P) courses practical examination will be combined, the course code stands FTL6B19P (Credits 5), Technology of Animal Foods FTL6B20P (Credits 5) and Analysis of Foods FTL5B14P (Credits 2) will be conducted at the end of 6th semester including Project work / In Plant training evaluation (Credit 2).

Practical Exam Pattern (Core & Complementary of 4-5 credits)

Rec		Work done	Spot test	Viva-voce	Total
	5	20x2	20	10	80

Practical Exam Pattern (Core & Complementary of 1-3 credits)

Record	Procedure	Work done	Spot test	Viva-voce	Total
5	5	15x2	10	10	60

Internal Evaluation

Internal evaluation will be of 20% in each course. The college has to send the marks obtained by the students in internal exam to the university by head of department through principal of the college. Internal assessment marks should be published in the department notice board. A grievance committee is constituted at department level to look in to the matter of any discrepancy. The internal assessment shall be based on a pre-determined transparent system involving written test, assignments, seminars and attendance in respect of theory course and on tests/records/viva-voce/attendance in respect of practical course. Internal evaluation for project shall be based on content and Method of presentation.

Distribution of Marks for Theory (Core & Complimentary) 4 to 5 credits (Max Internal 20)

Attendance		Test Paper		Seminar/Assignment/Viva		
85% and above	4 marks	85% - 100%	8 marks	Outstanding	8 marks	
75 - <85%	2 marks	65% - 85 %	6 marks	Excellent	7 marks	
50 - <75%	1 mark	55% - 65 %	4 marks	Very Good	6 marks	
		45% - 55%	3 marks	Good	5 marks	
		35% - 45%	2 marks	Average	4 marks	
		Less than 35%	1 mark	Poor	1 mark	
Maximum	4 marks	Maximum	8 marks	Maximum	8 marks	

Internal Test Papers - 60marks Pattern

Duration	Pattern	No. of Questions	Marks	Ceiling of Marks				
2 hrs	Short answer	6	5x2	10				
	Paragraph		2x5	10				
	Essay	4 2	1x10	10				
	Total Marks							

Distribution of marks for Theory (Core & Complimentary) 1 to 3 Credits (Max Internal 15)

Attendance		Test Paper		Seminar/Assignment/Viv	
85% and above	3 marks	85% - 100%	6 marks	Outstanding	6 marks
75 - <85%	2 marks	65% - 85 %	5 marks	Excellent	5 marks
50 - <75%	1 mark	55% - 65 %	4 marks	Very Good	4 marks
		45% - 55%	3 marks	Good	3 marks
		35% - 45%	2 marks	Average	2 marks
		Less than 35%	1 mark	Poor	1 mark
Maximum	3 marks	Maximum	6 marks	Maximum	6 marks

Internal Test Papers -80 marks pattern

Duration	Pattern	Total number of questions	Marks for each question	Ceiling of Marks	
	Short answer	6	5x2	10	
1 Hr	Paragraph	4	4x5	20	
	Essay	2	1x10	10	
	Total Marks				

Distribution of Marks for Practical (Core & Complimentary4-5 credits)

Components	Max
Attendance	5
Lab performance	5
Viva-voce	10

Distribution of Marks for Practical (Core & Complimentary 1-3 credits)

Components	Maximum 15 Marks
Attendance	5
Lab performance	2.5
Viva-voce	7.5

Project work / in plant training

Students of B.Sc. Food Technology should undergo a project/ in plant training work for a period of 15 days during the sixth semester. The programme is arranged by the department of Food Technology in consultation with the food industries inside and outside Kerala. The purpose of the program me is to get hands-on experience on various aspects of food industries that form the strong foundation for the young food technologists. The department will allot students to the industry, in consultation with the industry concerned and based on merit of the students. The selected student should report for the programme on the stipulated date and attend the programme regularly without any lapse. On completion, each student should prepare a project / training report duly certified by the supervisor in the industry, a seminar should be conducted in the department. The bonafide project/ training report attested by the head of the department will be evaluated by the external examiner and a viva voce will be conducted.

SEMESTER I

FTL1B01 – PERSPECTIVES OF FOOD SCIENCE & TECHNOLOGY

Number of Credits: 3

Objective

• To build up a strong base in Food science & Technology by providing knowledge in food composition, food quality assessment and nutritional facts of different foods. Knowledge on major research institutions, journals and industries related to the field.

Course Outline

Unit 1 – Introduction

Scope of food science and Technology. Functions of food. Nutrients, Water, Carbohydrates, Proteins, Lipids, Vitamins and Minerals. (2hours).

Unit 2 – Composition and nutritive value

Pulses & Legumes, Nuts & Oilseeds, Meat, Fish, Egg and Milk. Structure and composition of wheat and Rice. Classification and Composition of Fruits, Vegetables and Spices. (5hours)

Unit 3 – Food QualityAssessment

Sensory assessment-Appearance of food- visual perception, colour of foods, smell, flavour and taste. Threshold tests, difference tests, ranking test & hedonic scale. (3hours)

Unit 4 – Food Additives

Preservatives, coluring agents, flavour and flavor enhancer, Anti-oxidants, Artificial sweeteners, stabilizers, thickening agents, anticaking agents, bleaching and maturing agents, flour improvers, leavening agents, surface active agents. (3hours)

Unit 5 – Health Foods

Functional foods, Prebiotics, Probiotics, Neutraceuticals, organic foods, GM foods (1hour).

Unit 6 – Food Research & Food Technology updates

Major centres of food research in India –CFTRI, DFRL, NIFTEM, IIFPT & CIFT. Major Food Industries

in India. Journals:- Journals of Food Science & Technology, Indian Food Industry, Beverage Food World, Indian Food Packer. AFST (I)

- 8. Practical Demonstration- Pilot / Industrial scale Food Production / Processing
- 9. Industrial Visit I: Food Processing Unit.

SEMESTER II

FTL2B03 – FOOD MICROBIOLOGY – 1

Number of Credits: 3

Objective

Microbiology is an applied science, helping agriculture, health, and medicine and maintenance of the
environment. Micro-organisms are extremely important in our everyday lives. This course focuses on the
general principles of microbiology and includes the following topics: history of microbiology,
microscopy and microbial cell structure.

Course Outline

Unit 1 – Evolution

History of microbiology, theory of spontaneous generation, Germ theory of disease, Koch's postulates, pure culture concept (2hours).

Unit 2 – Microscopy

Parts of microscope, Resolving power, Limits of resolution, Refractive index, Magnification. Light microscope – Bright field, Dark field. Electron microscope – Transmission electron microscope, Scanning electron microscope. (3hours).

Unit 3 – Micro-organisms

Structure, Morphology, Physical condition required for growth, growth curve. Reproduction – Binary fission, Transformation, Transduction and conjugation.

a) Bacteria

Nutritional requirements – phototrophs, chemotrophs, Autotrophs, Heterotrophs. (5hours).

b) Fungi

Morphology, Classification, Reproduction – Sexual and Asexual. (2hours)

c) Yeasts

Structure, Morphology, Reproduction –Budding Reproduction –Sexual and Asexual. (2hours)

d) Virus

Classification, Composition, Morphology, Replication of virus (2hours)

FTL2B04P – FOOD MICROBIOLOGY – 1

Objective

- To learn the names and uses of different types of microbiology equipments & glasswares.
- To develop skills in microbiological laboratory techniques.

Course Outline

Practical

- 1. Introduction to equipments and glassware used in microbiology
- 2. Sterilization techniques: Dry heat and moist heat
- 3. Staining techniques simple staining, gram staining, negative staining.

SEMESTER III

FTL3B05 – FOOD ENGINEERING

Number of Credits: 3

Objective

• This course is designed to teach students the fundamentals of food engineering. Students will acquire knowledge of food engineering principles in food processing such as heat and mass transfer operations, refrigeration and various unit operations. This will help to understand the concepts of equipment of refrigeration, freezing, thermal processing, drying, and other food operations.

Course Outline

Unit 1 – Engineering Properties of food materials

Physical property – Size, Shape, Density, Specific gravity, Angle of repose.

Mechanical properties - Specific Heat, Thermal conductivity.

Rheological properties - Rheological characteristics of foods, viscosity, apparent viscosity- Newtonian and

Non-Newtonian. (6hours)

Unit 2 – Unit of Operations in Food Engineering

Basic principle types and applications: Blanching, Evaporation, Drying, Freezing & Chilling, Extrusion, Frying. (5 hours)

Unit 3 – Refrigeration and Freezing

Refrigeration Principle of refrigeration, Vapour compression refrigeration cycle. Freezing Principle of freezing & freezing rate. Types of freezers- Air blast, Contact, Immersion, Fluidized bed and Cryogenic freezers. (6hours)

Unit 4 – Evaporation

Principle, single effect evaporation, multiple effect evaporation.

Types of evaporators - Horizontal tube, Vertical tube, Falling film evaporator, Raising film Evaporator. (6hours)

Unit 5 - Driers

Driers Principle, constant rate & falling rate of period of drying.

Types of driers -Drum drier, Cabinet drier, Tunnel drier, Spray drier, Fluidized bed drier, Freeze drier. (6hours)

Unit 6 – Heat Transfer

Mode of heat transfer-Conduction, Convection, Radiation.

Unit 7 – Heat Exchanger

Classification, contact type heat exchange - Immersion, Non-contact type heat exchanger, Plate Heat exchanger, Scrape d surface Heat exchanger, Tubular Heat exchanger, Double & Triple tube Heat exchanger, Shell & Tube Heat exchanger.

Pasteurization: LTLT, HTST, UHT,

Pasteurizing equipments. (10hours)

Unit 8 – Boilers

Boiler- Principle, working of water tube & fire tube boiler (5 hours)

FTL3B06P - FOOD PROCESSING & PRESERVATION

Course Outline

Practical

- 1. Blanching of Vegetables.
- 2. Dehydration of vegetables using cabinet drier.
- 3. Determination of moisture content
- 4. Dehydration of fruits in sugar syrup
- 5. Qualitative determination of benzoic acid & SO2
- 6. Sensory evaluation
- 7. Industrial Visit II: Well established Food Processing Unit

SEMESTER IV

FTL4B07 – FOOD CHEMISTRY & ANALYTICAL INSTRUMENTATION

Number of Credits: 4

Objective

- To provide basic knowledge of structure, composition, chemical reaction & classification
- To know importance and properties of minor nutrients.
- To familiarise the principles and working of Instruments for food analysis

Course Outline

Unit 1 - Carbohydrates

Classification, properties and reactions of

- a) Monosaccharide's: Glucose& Fructose
- b) Oligosa ccharides: Maltose, lactose. Sucrose- properties- crystallization and inversion.
- c) Polysaccharides : starch: components of starch, gelatization, retrogradation, modified starch.

Cellulose, hemicellulose, pectic substances, gums, dietary fibre (8hours)

Unit 2 – Proteins

Introduction to food protein, structure of protein, classification of proteins, amino acids, physicochemical properties, denaturation, reactions, protein determination (6hours)

Unit 3 – Lipids

Classification, fatty acids, saturated, unsaturated, polyunsaturated fatty acids, chemical properties, reactions, rancidity, auto-oxidation, antioxidants. (6hours)

Unit 4 – Water

Introduction, physical & chemical properties of water, moisture in foods, methods of moisture determination, hydrogen bonding, Free & bound water (6hours)

Unit 5 – Pigments

Properties and Occurrence: Chlorophyll, Carotenoids, Flavanoids, Anthocyanins, Anthoxanthins, Myoglobin. (6hours)

Unit 6 – Enzymes

Introduction, Definition, Occurrence, Classification. Properties of Enzymes- Specificity, Factors affecting enzyme activity. Enzymes in food Industry. (6hours)

Unit 7 – Colloids

Colloidal chemistry, Properties of solutions, Sols & Suspensions, Food colloids. (4hours)

Unit 8 – Emulsions

Emulsion, Types, Emulsifying Agents (2hours)

Instrumentation (6hours)

Unit 9 – Colorimetry

Principles, Beer – Lambert's Law, Techniques and Instrumentation. Flurimetry.

Unit 10 – Spectrophotometry

Principles, Parts of Spectrophotometers. Atomic Absorption spectrophotometry (6hours)

Unit 11 – Chromatography

Classification - Adsorption, Partition, Ion exchange. Paper, Column, Thin layer, Gas chromatography, High Pressure Liquid Chromatography. GCMS (8hours)

SEMESTER V

FTL5B09 – FOOD MICROBIOLOGY - II

Number of Credits: 3

Objective

• Students will acquire knowledge on techniques for the isolation epidemiology of food borne, and spoilage of microorganism, the microbiology of water, milk, fermented foods

Course Outline

Unit 1 - Culture Media

Bacteriological Media – Selective, Differential, Enrichment Media. (5hours)

Unit 2 - Methods of isolating Pure culture

Serial dilution, Pour plate, streak plate, stroke Culture. (5hours)

Unit 3 - Control of Microorganism

Physical agents – high temperature, low temperature, desiccation, osmotic pressure radiation, filtration.

Chemical agents-Characteristics of an ideal antimicrobial chemical agent, Alcohols, Aldehydes, Dyes,

Halogens, Phenols, Acids, Alkalis, Gases. (6hours)

Unit 4 - Food spoilage

Food spoilage: Sources of contamination, factors responsible for spoilage, factors affecting kinds and number of microorganisms in food. Chemical changes due to spoilage. (8hours)

Unit 5 - Effect of spoilage

Contamination and spoilage of Fruits and Vegetables, Meat & Meat products, Milk & Cream, Cereal & Cereal products, Spoilage of canned food. (8hours)

Unit 6 - Microbial intoxications & Infections

Definition, Exotoxin, Endotoxin, intoxications and infections – sources, symptoms Methods of Prevention and investigation of food borne disease outbreak. (7hours)

Unit 7 - Microbes in fermented foods

Fermented vegetable products, Sauer Kraut, pickles, soy sauces, idli Fermented dairy products – Cheese, yoghurt (5hours)

Unit 8 - Water & Milk testing

Microbiological testing of water & milk (4hours)

FTL5B10 – CEREALS, PULSES AND OIL SEEDS TECHNOLOGY

Number of Credits: 4

Objective

- To introduce science & technology associated with cereals, pulses & oil seeds.
- To exposure to various baking technologies including bread, cake, biscuit and confectionaries.
- To provide a good knowledge on processing technologies related to rice, wheat, millets, pulses, nuts and oilseeds.

Course Outline

Unit 1 - Technology of Wheat and Rice

Wheat: Milling of wheat, byproducts – Whole wheat flour, Maida, semolina, Gluten.

Rice: Milling of rice, byproducts of rice milling – Husk, Bran, Broken ice Parboiling- Merits and demerits, Curing, Aging of rice, Rice products – Flaked rice, Puffed rice. (15hours)

Technology of Oats and Barley

Unit 2 – Bakery & Confectionary

Baking: Principles of baking, classification of baked foods. (4hours)

Bread: Bread making –Role of ingredients, Bread faults & remedies, staling of bread. (10hours)

Cake: Cake making, Role of ingredients, Types of making, cake faults and remedies. (9hours)

Biscuit : Biscuits & Cookies, Crackers and Wafers, technology of Biscuits, faults & Remedies (8hours)

Confectionary: Raw materials, Hard candy, Toffee, Caramel.

Unit 2 – Millets

Pearl millet, Finger millet (5hours)

Unit 4 – Pulses

Processing- Soaking, Germination, Decortication, Cooking and Fermentation. Changes during germination, Antinutritional factors, Factors affecting cooking time. (5hours)

Unit 5 - Nuts & Oil seeds

Sources, Composition, Processing of oil seeds – Soya bean, coconut. Hydrogenation. Refining of fats & oils, bleaching, de-odourising, hydroxylation, shortening, margarine. Protein isolates, Texturised vegetable protein (8hours)

FTL5B11 – FOOD PRESERVATION & PACKAGING TECHNOLOGY

Number of Credits: 3

Objective

Food preservation prevents undesirable changes in the wholesomeness, nutritive value or sensory quality of food and reduces chemical, physical and physiological changes of an objectionable nature and eliminates contamination. The goal of food preservation is to increase the shelf life of a food while keeping it safe. It ultimately ensures its supply during times of scarcity and natural drought. By means of both enormous reduction in spoilage of perishable foods by preservation and newly developed products it is possible to build up country's economy by making more food available to the people at affordable prices.

Course Outline

Unit 1 – Thermal Processing

Principles and application—Blanching, Pasteurization, Sterilization, Ultra high temperature sterilization, Canning, Aseptic processing. (5hours)

Unit 2 – Drying

Significance: Natural drying- Sun and Solar drying, Artificial drying- Hot air drying, drying pre-treatments – sulphuring & Sulphiting, Dehydrofreezing, Freeze drying. (8hours)

Unit 3 – Low Temperature Processing

Refrigeration: Low temperature preservation of Fresh Fruits, Vegetables, Meat & Fish products. Chilling injury. (5hours)

Freezing: Principle, Freezing rate, Quick freezing, Slow freezing, Quality of frozen foods- Retrogradation, Protein denaturation, Freezer burn. (3hours)

Unit 4 – Irradiation

Source of ionization irradiation, Dose and Dosimetry, Mode of action, Scope of irradiation. (3hours)

Unit 5 – Fermentation

Principles, Significance, Types of fermentation - Acetic, Lactic and Alcoholic. (3hours)

Unit 6 – Chemical Preservation

Natural preservatives-Mode of action. Chemical Preservatives - Sulphur dioxide, Benzoic acid, Sorbic acid, Propionic acid, Acetic acid. (4hours)

Unit 7 - Recent Trends

Food preservation applications – Pulsed electric fields, High pressure technology, Ohmic heating, Microwave heating, Ultrasonics, Nanotechnology, Hurdle technology.

Unit 8 – New Product Development

Food needs, consumer preference and Market survey, Steps in new product development. (3hours)

Unit 9 – Introduction to Food Packaging

Definition, functions & Properties. Classification of packaging – Primary, Secondary, Tertiary Packaging. Flexible, Rigid & semi rigid packaging materials. (4hours)

Unit 10 – Types of Packages & Technologies

Metal, Glass, Paper, Plastic, Retortable Pouches, CAP, MAP, Smart, active, Aseptic, Biodegradable, Edible packages. Packaging symbols, Nutritional labelling. (10hours)

FTL5B12P – CEREALS, PULSES & OIL SEEDS TECHNOLOGY

Course Outline

Practical

- 1. Determination of Moisture
- 2. Determination of Ash
- 3. Sedimentation value
- 4. Determination alcoholic acidity
- 5. Estimation of Gluten
- 6. Determination of Water absorption power
- 7. Qualitative analysis of gluten Belshanke value
- 8. Determination of falling number
- 9. Preparation of Bread

- 10. Preparation of Biscuit
- 11. Preparation of Cake
- 12. Determination of Physical parameters of wheat and rice
- 13. Industrial Visit I II: Food research institute/industry.

FTL5B13P – FOOD MICROBIOLOGY II

Objective

- To study the methods of isolation and culturing of microorganisms
- To analyse different types of specimens microbiologically:

Incoming raw material such as meat Water -treated & raw water for coliforms Microbial flora in foods such as milk

Course Outline

Practical

- 1. Isolation of pure culture: Pourplate, Streak plate
- 2. Microbial analysis of meats Total plate count Staphylococcus
- 3. Microbial analysis of Milk- Total plate count, Spices-Yeast and Mold, TPC
- 4. Microbial analysis of water Coliforms

FTL5B14P – ANALYSIS OF FOODS

Number of Credits: 2

Course Outline

Practical

- 1. Determination of reducing sugar, total reducing sugar in honey/jaggery/sugar (Lane & Eynone Method).
- 2. Determination of Fructose: glucose ratio in honey (Iodiometry).
- 3. Determination of Gum Base Content in Bubble gum/ chewing gum/ Cocoa butter (soxhlet extraction method)
- 4. Detection and identification of synthetic food colours (Paper chromatographic method/ TLC)
- 5. Determination of Fat content in cocoa butter
- 6. Determination of acidity of extracted fat in cashew nuts / biscuits (Soxhlet extraction method)
- 7. Estimation of crude fibre in fruits
- 8. Estimation of starch content in vegetables
- 9. Estimation of Protein (Colorimetric method) content in food.
- 10. Estimation of invert sugar in Jaggery/Honey
- 11. Test for chicory in coffee
- 12. Determination of Peroxidase enzyme
- 13. Rehydration ratio of dried foods

SEMESTER VI

FTL6B15 – DAIRY TECHNOLOGY

Number of Credits: 3

Objective

• Knowledge and experience to manufacture safety and high-quality

Course Outline

Unit 1 – Composition

Composition of milk from various sources, factors affecting composition of milk. (6hours)

Unit 2 – Properties

Physical and Chemical properties- Flavour, Colour, acidity, viscosity, Specific gravity, Freezing point, Boiling point, Effect of- heat, enzymes, acids and alkali. (7hours)

Unit 3 - Types of Milk

Toned, Double toned milk, Standardized milk, Homogenized milk, and Recombined milk. (6hours)

Unit 4 - Processing Milk

Processing, distribution and storage of liquid milk. (4hours)

Unit 5 - Dairy Products

a) Cream and Butter

Composition, Processing and Technology. Theories and factors affecting Churning (4hours)

b) Ice cream

Technology of Icecream: Ingredients, formulations, Freezing, Hardening, Storage, Distribution and defects. Frozen dessert. (5hours)

c) Cheese

Introduction, Classification of cheese. Processing of cheese: Cottage and Cheddar. (4hours)

d) Fermented milk Products

Curd, yoghurt, Acidophilus milk, Kefir, koumiss, Probiotic (3hours)

e) Milk powder

Whole and skim milk powders, Instant milk powder. (5hours)

Unit 6 - Technology of Dairy by-products

Whey protein products. (1hour)

Unit 7 - Dairy plant sanitation

Objectives, CIP, Sanitizers. (3hours)

Reference

FTL6B16 – TECHNOLOGY OF ANIMAL FOODS

Number of Credits: 4

Objective

• The course provides a good knowledge on the basic principles involving in animal food industry which includes selection of raw materials, slaughtering techniques, preservation technologies, by product utilization of meat, poultry and fish.

Course Outline

Unit 1 - Slaughter and Inspection of Meat

Humane method, Inspection of meat- Ante mortem and post-mortem inspection. Slaughter of sheep, pigs, poultry. Post mortem changes, ageing. Structure of meat, Factors affecting tenderness of meat, Effect of

cooking on texture, colour and flavour. (10hours)

Unit 2 - Cured Meat

Role of ingredients, Methods of curing, Processing of Ham, Bacon. Sausage - classification, emulsion, ground sausage, processing, casings, Factors affecting quality of cured meat (10hours)

Unit 3 – Preservation

Refrigeration, freezing, thermal processing, dehydration, irradiation, chemical, antibiotics. (8hours)

Unit 4 – By-products

Rendering, Feeds, Hides, Skins, Hoofs, Horns. (6hours)

Unit 5 – Egg

Grading, Changes during storage. Egg quality- Factors affecting egg quality, Measures of egg quality, Effect of cooking, Factors affecting coagulation, Industrial use of egg. Preservation of egg Refrigeration, Freezing, Thermal processing, Dehydration, Coating. (14hours)

Unit 6 - Fish & Fish Products

Introduction, Spoilage indices Preservation Cold storage, freezing, smoking, pickling, canning of fish, Drying Fish products Fish protein concentrate, Fish oils- Body oil, Liver oil, Fish meal, Fish Ensilage, Chitosan, pearl Essence, Glue, Gelatin. (16hours)

FTL6B17 – FOOD SAFETY, FOOD LAWS & REGULATIONS

Number of Credits: 4

Objective

• The major objective of this course is to teach the students to understand the concept of food safety and quality management. Students can understand the fundamentals of food sampling, food adulteration and packaging technology. Students can also understand the overall requirements for the food plant sanitation. Students can learn about the current food laws and regulations.

Course Outline

Unit 1 - Food Safety & Hygiene

Importance of Food Safety, Food Hygiene, Highrisk food, Low risk food, Danger Zone, Personal hygiene. (7hours)

Unit 2- Food Safety and Quality Management

GHP, GMP, SOP, HACCP (Food contaminants-Physical, Chemical, Biological and Allergens), ISO 22000,

ISO 9001, Codex Alimentarius Commission (Codex), FAO (16hours)

Unit 3 - Traceability & Recalling

Objectives and Applications (3 hours)

Unit 4 - Food PlantSanitation

Structural requirements, SSOP, CIP, Chlorination, Detergents, Disinfectants and Sanitizers, (8hours)

Unit 5- Food Laws & Regulations

Food Safety and Standards Act, FDA, Evolution in Food laws and regulations- PFA,FPO, AGMARK, BIS,

(10hours)

Unit 6 - Food Adulteration

Common Food adulterants and their tests: Milk,

Vegetable oil, Spices, Tea, Pulses, Sugar, Honey (10hours)

Unit 7 - Food Sampling

Objectives, Sample collection, Sampling tools, Sampling procedure, Analysis. (10hours)

FTL6B18 – TECHNOLOGY OF FRUITS, VEGETABLES, SPICES & PLANTATION CROPS

Number of Credits: 4

Objective

• The major objective of this course is to teach the students to understand the concept of food safety and quality management. Students can understand the fundamentals of food sampling, food adulteration and packaging technology. Students can also understand the overall requirements for the food plant sanitation. Students can learn about the current food laws and regulations.

Course Outline

Unit 1 - Post harvest management

Maturity indices, Ripening, Changes during ripening-Climacteric & Non-Climacteric, storage-Controlled Atmospheric & Modified Atmospheric Storage (6hours)

Unit 2 - Pectin, Jam, Jelly and Marmalade

Pectin Definition of pectin, classification, Pectic enzymes, Properties, jelly grade of pectin, Testing of pectin. Jam, Jelly and Marmalade Definition, jam making, jelly making, Defects. (6hours)

Unit 3 - Fruits juices & Fruit preparations

Fruit Juices Ready to serve beverages, Squashes Cordials, Nectars, Concentrates Fruit juice powder- Free ze drying, Foam mat drying.

Fruit preparations Preserves, Candies Crystalli zed fruits & G l zed fruits.

Pickle and chutneys - Action of preservatives Pickling process, defects. (10hours)

Unit 4 - Tomato products

Tomato juice, puree, paste & Ketchup specification of the above products. (6hours)

Unit 5 – Canning

Classification of canning of fruits- Pineapple, Oranges, Canning of vegetables - Peas, Carrots, syrups & brines for canning (6hours)

Unit 6 - Drying & Dehydration

Enzyme Inactivation, Sulphuring Sun drying - grapes and dates. Dehydration of vegetables and Fruits. (4 hours)

Unit 7 – Browning

Enzyme activity, enzymatic browning Non-enzymatic browning, its prevention. (4 hours)

Unit 8 – Spices

Definition, classification, chemical composition, uses of spices. (4hours)

Unit 8 – Major Spices

Refining and processing of pepper. Pepper products – white pepper, dehydrated green pepper.

Processing of Turmeric, Ginger, Chillies and Cardamom. Spice oils & oleoresins. (8hours)

Unit 9 - Tea, coffee & Cocoa

Chemical composition, processing & grading (10hours)

FTL6B19P – TECHNOLOGY OF FRUITS, VEGETABLES, SPICES & PLANTATION CROPS

Number of Credits: 5

Course Outline

Practical

- 1. Determination of Sulphur dioxide
- 2. Estimation of Vitamin C
- 3. Estimation of tannin colorimetric method
- 4. Estimation of alcohol content
- 5. Determination of salt content in pickles
- 6. Determination of reducing sugar
- 7. Lye peeling
- 8. Adequacy of blanching
- 9. Preparation of ketchup
- 10. Preparation of Jam & Jelly
- 11. Preparation of squash

FTL6B20P – TECHNOLOGY OF ANIMAL FOODS

Number of Credits: 5

Objective

- To perform various platform tests for milk
- To identify the difference between milk packets
- To prepare khoa or peda by using milk

Course Outline

- 1. Acidity of Milk & curd
- 2. Fat content in Milk
- 3. Determination of total solids, SNF and specific gravity of milk
- 4. Determination of Total ash in milk
- 5. Acidity of butter
- 6. Moisture content of butter
- 7. Salt content in butter
- 8. Adulteration in milk
- 9. Preparation of Khoa, Peda
- 10. Moisture content in Ghee
- 11. FFA of Ghee
- 12. Internal & External quality of egg
- 13. Proximate composition of Meat & Fish

OPEN COURSE FTL5D01 – TECHNOLOGY OF SPICES

Number of Credits: 3

Objective

• To understand the basic knowledge about Major spices and its products.

- To know the Chemical composition of spices and manufacturing technology of Spice oil and oleoresins.
- To get the knowledge about processing technology of major Spices.

Course Outline

Unit 1 - Spices, Spice oils & Oleoresin

Definition, Classification, Chemical composition, Use of Spices. Spice oil and Oleoresins - Definition, Technology of Manufacturing (10 hours)

Unit 2 - Major Spices:

a) Pepper

Refining and processing of pepper.

Pepper products: White pepper, dehydrated green pepper, Pepper oil, Oleoresin. (10 hours)

b) Chillies

Drying of chillies, quality attributes of chillies and paprika (7hours)

c) Cardamom

Composition, Drying of fruits, Bleaching, Grading, Cardamom products, Essential oil and oleoresins (7hours)

d) Ginger

Curing, Bleaching, Grading Ginger Products, Ginger oils, Ginger oleoresin, Dehydrated Ginger, Bleached Ginger (7hours)

e) Turmeric

Curing, Grading, Turmeric powder, Essential oil, Oleoresin (7hours)

FTL5D02 – FRUITS AND VEGETABLES PROCESSING

Number of Credits: 3

Objective

- To introduce science and technology associated with fruit and vegetable processing.
- To know about the principles in processing of fruit and vegetable.
- To understand the quality specification of different fruit and vegetable products.

Course Outline

Unit 1 - Fruits and Vegetables

Definition, Composition, Classification, Nutritive value, changes during ripening. Flavors of Fruits and Vegetables. Vegetable cookery, changes during cooking Browning and its prevention (15hours)

Unit 2 - Preservation of Fruits and Vegetables

Heat, Salt, Sugar, Freezing, Food additives (9 hours)

Unit 3 - Fruit and Vegetable Products

Fruit Juice, Squashes, Cordials, Nectar, Concentrates, Fruit juice Powder, Jam, Jelly. Different types of Pickles and Chutneys.

Product Specification (15hours)

Unit 4 - Tomato Products

Tomato juice, Puree, Paste, Ketchup (9hours)

FTL5D03 - FOOD AND HEALTH

Number of Credits: 3

Objective

- To understand the basic concept of food which includes classification, Nutritional composition,
 Different sources, recommended dietary allowance and various methods of nutrient measurement on body requirement.
- To provide knowledge about food additives, Food adulteration, and Food Poisoning.

Course Outline

Unit 1 - Introduction to Food

Definition, Types and classification of Food- junk food, functional food, Nutritional composition of Food-Carbohydrate, Protein, Fat, Water, Mineral, Vitamins, Food Groups.

Sources of Food - carbohydrate, protein, fat.

Recommended daily allowance of nutrients.

Types of work and energy requirements.

Body Mass Index (12hours)

Unit 2 - Life style and Food related diseases

Obesity, Diabetics, cardio vascular Disease, constipation, Intolerance-Lactose & Gluten, Chinese syndrome (12hours)

Unit 3 - Food Additives

Definition, importance in food preparation, functions of food additives - anti -oxidants, preservatives, coluring agent, flavours, and emulsifiers. (8hours)

Unit 4 - Food Adulteration

Definition, common adulterants found in food. (8hours)

Unit 5 - Food allergens and food poison

Definition, common adulterants found in food.

Common food allergens. Food poisoning, symptoms and control, Botulism, Staphylococcus, E.coli and salmonella (8hours)

A014 - NUTRITION AND HEALTH

Number of Credits: 4

Objective

Nutrition and Health study deals with the importance of food and nutrients supplementation in human diet. It has an application in healthcare in daily life and for meal planning. In these decades the aware about dietary requirements and nutritive value of different food is leads to prevent malnutrition among people. The goal of this education is to reinforce specific nutrition related practices or behaviors to change habits that contribute to poor health; this is done by creating a motivation for change among the students, to establish behavior for promotion and protection of good health.

Course Outline

Unit 1 – Concept of Health

Definition of physical health, mental health, social health, spiritual health-determinants of health, indication of health (4hours)

Unit 2 – Concept of Nutrition

Definition of terms: Nutrition, under nutrition, Malnutrition, Health & Nutritional status – adequate, optimum & good nutrition. Relation of good nutrition to normal physical development & sound health (6hours)

Unit 3 – Energy

Definition of Caloric & Joule. Measurement of calorific values of food, basal metabolism, specific dynamic action of foods, energy needs of body, measurement of energy balance of body (6hours)

Unit 4 – Food Guide

Nutrients supplied by foods. Basic food groups (4hours)

Unit 5 – Carbohydrates

Sources, Classification, digestion, absorption, transportation & utilization, functions, sources, requirements and effect of deficiency. Dietry Fibre- Definition, classification, sources, role of fibre in human nutrition (8hours)

Unit 6 - Proteins

Classification, digestion absorption, transportation & utilization, functions, sources & requirements. Essential aminoacids, evaluation of protein quality, supplementation and deficiency. (8hours)

Unit 7 – Lipids

Classification, saturated and unsaturated fatty acids, digestion, absorption, transportation & utilization, functions, sources & requirements and effect of deficiency (10hours)

Unit 8 – Minerals

Functions, sources, absorption and factors affecting the utilization of Calcium, Phosphorus, Iron, Iodine, Copper and Flouride, effects of deficiency (6hours)

Unit 9 – Vitamins

Classification, functions, sources, factors affecting destruction, factors enhancing vitamins in foods, absorption, requirements & deficiency conditions – Vit A, D, E, K, Ascorbic acid, Thiamine, Riboflavin, Niacin, Pyridoxine, Folic acid, Pantothenic acid (8hours)

Unit 10 – Water

Importance, distribution in body, function sources, requirements, water balance (6hours)

MODEL QUESTION PAPERS FTL 1 B 01 PERSPECTIVES OF FOOD SCIENCE & TECHNOLOGY (3 credits)

Time 2 Hours Total 60 Marks

SECTION A

Each carry 2 marks (Max.20 Marks)

- 1. Define Carbohydrates.
- 2. Name proteins present in Egg.
- 3. Give two examples for monosacharides.
- 4. Name any two Anti-Oxidants?
- 5. Expand IICPT and DFRL.
- 6. Name any four oil seeds.
- 7. What are amino-acids? Give examples.
- 8. Name major spices.
- 9. Give two probiotics.
- 10. What do you mean by organic foods?
- 11. Write the importance of Milk in human nutrition.
- 12. What are stabilizers?

SECTION B

Each Carry 5 marks (Max.30 Marks)

- 13. Write on composition and nutritive value of Milk.
- 14. Write a note on health foods.
- 15. Structure and composition of Rice.
- 16. Write a short note on preservatives.
- 17. Write on Carbohydrates and it's classification.
- 18. Discuss in detail about CFTRI and DFRL.
- 19. Write about sensory analysis of food.

SECTION C $(1 \times 10 = 10)$

- 20. Discuss in details about health foods.
- 21. Composition and nutritive value of Meat, Fish and Egg.

FTL 2 B 03 FOOD MICROBIOLOGY - I (3 credits)

Time 2 Hours Total 60 Marks

SECTION A

Each carry 2 marks

(Max.20 Marks)

- 1. What are the 4 stages of the bacterial growth curve?
- 2. What is the difference between positive and negative staining?
- 3. What happens during binary fission in bacteria?
- 4. Write a note on ascomycetes.
- 5. Define limits of resolution of a microscope.
- 6. Write the classification of Virus.
- 7. Differentiate prokaryotes and eukaryotes.
- 8. What is pure culture technique?
- 9. Write a note on bacteriophage.
- 10. Write the parts of a microscope.
- 11. Define water activity.
- 12. What is staining technique?

SECTION B

Each Carry 5 marks (Max.30 Marks)

- 13. Differentiate TEM and SEM.
- 14. Write a note on theory of spontaneous generation.
- 15. Write the sexual reproduction in bacteria.
- 16. Briefly explain bacteriophage.
- 17. Write a note on structure of fungus.
- 18. Explain bacterial growth curve.
- 19 Write a note on Morphology of Virus.

SECTION C (1x10=10)

- 20. Explain the structure of bacterial cell with the aid of a neatlylabelled diagram, also mention the roles of these structures.
- 21. Explain electron microscopy.

FTL 3 B 05 FOOD ENGINEERING (3 Credits) Time 2.0 Hours Total 60 Marks

SECTION A

Each carry 2 marks (Max.20 Marks)

- 1. Write the equation for Stephan Boltzmann's law.
- 2. List the important components of refrigeration system.
- 3. Briefly explain the types of atomizers used in spray dryers.
- 4. Differentiate contact and non-contact heat exchangers.
- 5. Define Apparent Viscosity.
- 6. Write briefly about fire tube boiler.
- 7. Differentiate conduction and convection mode of heat transfer.
- 8. Give plank's equation to estimate freezing time.
- 9. Briefly describe falling film evaporator.
- 10. Differentiate pasteurization and sterilization.
- 11. Give an equation to explain rate of convective heat transfer.
- 12. Differentiate Newtonian and Non-Newtonian fluids.

SECTION B

Each Carry 5 marks (Max.30 Marks)

- 13. With the help of a neat sketch explain the working of shell and tube heat exchanger.
- 14. Explain in detail the vapor compression refrigeration cycle.
- 15. Explain the working of multiple effect evaporators. What are its advantages over singleeffect Evaporator.
- 16. Explain the working of water-tube boiler. How it is different from fire-tubeboiler?
- 17. List the important characteristics that are usually considered in the selection of refrigerant.

Explain their importance

- 18. What is viscosity? Give SI unit of viscosity. Explain how apparent viscosity is calculated?
- 19. What is freezing point depression? Explain the working of Air blast freezer.

SECTION C (1x10=10)

- 20. With the help of a neat sketch describe the working of rising film evaporator. How it is different fromfalling film evaporator. Give merits and demerits of these evaporators.
- 21. What are the applications of freezing in food processing? With the help of a neat sketch explain the working of immersion freezer. What are its limitations and

FTL 4 B 07 FOOD CHEMISTRY & ANALYTICAL INSTRUMENTATION (4 Credits)

Time 2.5Hours Total 80 Marks

PARTA

Each carry 2 marks

(Max.25 Marks)

- 1. Name two method of estimating protein in food material
- 2. What are enzymes?
- 3. What is enzymatic browning
- 4. What is the principle of Paper chromatography?
- 5. What you mean by emulsion?
- 6. How are proteins classified?
- 7. Mention different gases used in gas chromatography
- 8. Write down the principles of TLC
- 9. State Beer-lamberts law
- 10. Mention the important part of HPLC
- 11. What are essential amino acids? Give any two examples.
- 12. Write the chemical name of Fat?
- 13. Write two function of Fat?
- 14. Classify protein.
- 15. What is gelatinisation of starch?

PART B

Each Carry 5 marks (Max.35 Marks)

- 16. Kjeldahl's Methods for estimati on of Protein
- 17. Classification of Carbohydrates
- 18. Hydrogenation
- 19. Discuss the steps in Thin layer chromatography.
- 20. Non-Enzymatic browning reaction
- 21. Write the principle of HPLC
- 22. Write a note on Column Chromatography
- 23. Classify fatty acids. Give examples.

PARTC (2x10 = 20 Marks)

- 24. What are enzymes? What are the uses of enzymes in food industry?
- 25. Explain in detail about the determination of moisture?
- 26. Discuss briefly about chromatography techniques? How paper chromatography isapplicable in food analysis?
- 27. Explain in detail of working of Atomic Absorption Spectrophotometer?

FTL 5 B 09 FOOD MICROBIOLOGY II (3 Credits)

Time 2.5 Hours Total 60 Marks

Part A

Each carry 2 marks (Max.20 Marks)

- 1. What do you mean by Asepsis?
- 2. What is food intoxication? Give an example
- 3. Name any three viruses associated with food poisoning
- 4. Differentiate between exotoxin and endotoxin.
- 5. Differentiate yeast and mold
- 6. Name any two bacteria and two molds involved in spoilage of meat
- 7. Define coli forms
- 8. What is serial dilution
- 9. Physical and agent used for controlling micro-organism.
- 10. What is TA Spoilage?
- 11. How does contamination takes place in milk?
- 12. Mention any two spoilage in meat?

Part B

Each Carry 5 marks (Max.30 Marks)

- 13. Explain food poisoning caused by *C. Botulinum*
- 14. Explain preservation by high temperature
- 15. What is sauerkraut? Describe the process involved in the production of sauerkraut
- 16. Differentiate pour plate and streak plate
- 17. Explain microbiological testing of milk
- 18. Describe the spoilage canned by thermophillic spore foaming bacteria in canned foods?
- 19. Differentiate selective and differential media.

Part C

1x10 = 10 Marks

- 20. What is MPN? Describe the methods involved in testing of water
- 21. Explain the spoilage in canned food.

FTL 5 B 10 CEREALS, PULSES & OIL SEEDS & TECHNOLOGY (4 Credits) Time 2.5 Hours Total 80 Marks

PARTA

Each carry 2 marks (Max.25 Marks)

- 1. What is floor time?
- 2. Define rheology?.
- 3. What is leavening agent?
- 4. What is Parboiling of rice?
- 5. Define principles of baking?
- 6. What is staling of bread?
- 7. What is anti nutritional factors in Pulses?
- 8. What is decortication of nuts?
- 9. Draw the structure of wheat and name the parts?
- 10. What is tempering of Wheat?
- 11. Name the different mixing method of cakes?
- 12. Write the ingredients used in biscuit making.
- 13. What is toffee?
- 14. Diferentiate between crystalline candy and non crystalline candy?
- 15. Differentiate between cookies and biscuit?

PARTB

Each Carry 5 marks (Max.35 Marks)

- 16. What do you mean by leavening action.
- 17. What is Gluten? Give its importance.
- 18. What is parboiling, write its advantages.
- 19. What do you mean by curing of rice?
- 20. Write the importance of role of ingredients in bread.
- 21. Explain toffee manufacturing briefly.
- 22. What is the impact of ageing of wheat flour? How ageing could be Minimized by using chemicals?
- 23. Write on TVP

PART C

Answer any two of the following

(2x10 = 20 Marks)

- 24. Explain the milling of wheat in detail.
- 25. What is parboiling and differentiate between single boiled and double boiled rice. Writethe merits and demerits of Parboiling.
- 26. Write in detail about various processing steps of bread manufacture.
- 27. Describe in detail on the processing of oil seeds.

FTL 5 B 11 FOOD PRESERVATION & PACKAGING TECHNOLOGY (3 Credits) Time 2 Hours Total 60 Marks

SECTION-A

Each carry 2 marks

(Max.20 Marks)

- 1. State the importance of blanching in food preservation
- 2. Differentiate slow and quick freezing.
- 3. Expand:1)HTST 2) UHT
- 4. Mention any two application of Irradiation in food.
- 5. Give any one example for artificial preservative and state its function.
- 6. What is fermentation and give example?
- 7. What you mean by chilling injury?
- 8. Principle of microwave heating
- 9. Write a note on Ultrasonics.
- 10. Principle of drying
- 11. What you mean by Hurdle technology.
- 12. What is the unit of radiation?

SECTION-B

Each Carry 5 marks (Max.30 Marks)

- 13. Give an outline of food irradiation
- 14. Write a note on ohmic heating
- 15. Write a note on high pressure technology
- 16. Explainsteps in new product development
- 17. What do you mean by cry ogenic freezing
- 18. Write a note on freeze drying
- 19. Differentiate acetic and lactic fermentation

SECTION-C

(1X10=10 Marks)

- 20. Explain the mechanism of spray and drum driers?
- 21. What are different methods of freezing?

FTL 6 B 16 TECHNOLOGY OF ANIMAL FOODS (4 Credits)

Time 2.5 Hours Total 80

Marks Part A

Each carry 2 marks

(Max.25 Marks)

- 1. Write on Ageing of meat.
- 2. Distinguish between penetrative and non penetrative bullets in stunning
- 3. Comment on Post mortem examination of meat.
- 4. What is Thermostabilization?
- 5. Comment on rendering in animal by-product utilization.
- 6. Explain meat tenderization and the methods.
- 7. Write on the role of irradiation in meat preservation.
- 8. What are the egg quality parameters.
- 9. Describe the different grades of eggs on their size.
- 10. What are comminute and non comminute meat products.
- 11. Give a detail on stunning of animals.
- 12. Differentiate between PSE and DFD meat.
- 13. Write the function of curing salt in meat.
- 14. What is the equation for Haugh Unit and write the significance.
- 15. What is the De-acetylated form of Chitin and its uses?

Part B

Each Carry 5 marks (Max.35 Marks)

- 16. Write on the structure of meat with a detailed sketch.
- 17. Write a short note on casings used in sausage manufacture.
- 18. What is fish gelatin? How is it obtained and write the uses.
- 19. Explain briefly on the production of FPC and its application in food industry.
- 20. Brief on the slaughterhouse waste utilization.
- 21. Elaborate on the processing of poultry with the help a flow diagram.
- 22. Write the chemistry of curing and give detailed description on the ingredients.
- 23. Write the factors influencing the colour and flavor of meat.

Part C (2×10=20 marks)

- 24. With the help of a neat sketch describe the lairage in a meat industry.
- 25. What is Humane method of slaughter and the methods involved. Describe theslaughtering and processing of pig.
- 26. What is meat emulsion? With the help of a flow chart write the processing of a comminuted meat product and classify it based on the final product availability.
- 27. Elaborate on the physical, chemical and microbiological spoilage of fish. What are the majorproducts and byproducts of fish industry?

FTL 6 B 15 E DAIRY TECHNOLOGY (3 Credits)

Time 2Hrs.

Total 60 Marks

Section A

Each carry 2 marks

(Max.20 Marks)

- 1. What is CIP
- 2. Difference between ice-cream and frozen desert
- 3. Health benefits of probiotics
- 4. Explain any two quality control tests for milk
- 5. Milk fat percent of light, heavy, and plastic cream
- 6 What is standardized milk.
- 7. What is rennet
- 8. Physicochemical properties of cream. Explain any two
- 9. What is yoghurt
- 10. Explain the role of calcium chloride in cheese processing
- 11. What is acid curd in cottage cheese.
- 12. What is hardening in ice-cream.

Section B

Each Carry 5 marks (Max. 30 Marks)

- 13. Define Ice-cream? Explain overrun in ice cream
- 14. Define the steps in cream processing
- 15. What are the factors affecting composition of milk
- 16. Differentiate Homogenised and Recombined Milk?
- 17. What is pasteurization. Explain UHT pasteurization.
- 18. What is cheese? Classify cheese.
- 19. Define churning. Explain factors influencing churnability of cream?

Section C

 $(1 \times 10 = 10)$

- 21. Physcio chemical properties of milk
- 22. Explain the steps in cheese making

FTL 6 B 17 FOOD SAFETY, FOOD LAWS & REGULATIONS

Time 2.5 Hours
Marks

Total 80

SECTION-A

Each carry 2 marks

(Max.20 Marks)

- 1. What do you meant by MAP?
- 2. Differentiate primary and secondary packaging?
- 3. Differentiate high risk food and low risk food?
- 4. Define food adulteration?
- 5. Name any four sampling tools?
- 6. What do you meant by CAC?
- 7. Differentiate disinfectants and Sanitizer?
- 8. List any four physical hazards?
- 9. What do you meant by CAP?
- 10. Name any one adulterant used in milk and it's detection method?
- 11. What do you meant by non-probability sampling.
- 12. What do you meant by SSOP?
- 13. What do you meant by FDA?
- 14. List four important functions of packagin?
- 15. Write about FAO?

SECTION-B

Each Carry 5 marks (Max.35 Marks)

- 16. Write a note on GMP and GHP?
- 17. Outline the structural requirements of a food plant?
- 18. Write a note on traceability and recalling?
- 19. Write a note on common food adulterants and their tests?
- 20. Explain about the functions and design of glass packaging material?
- 21. Write about Personal Hygiene for food safety?
- 22. Differentiate between active and smart packaging with examples.
- 23. Write short note on ISO:22000

SECTION-C (2X10==20)

- 26. Briefly discuss about Food Safety and Standards Act?
- 27. Briefly discuss the recent trends in packaging?
- 28. Explain in detail HACCP principles and process in Food Industry
- 29. Write in detail any food safety management system.

FTL 6 B 18 TECHNOLOGY OF FRUITS, VEGETABLES, SPICES & PLANTATION

CROPS (4 credits)

Time 2.5 Hours Total 80 Marks

PART A

Each carry 2 marks

(Max.25 Marks)

- 1. Name the pectin degrading enzymes
- 2. Write the specification tomato sauce
- 3. Define maturity index of fruits
- 4. What is controlled atmospheric storage?
- 5. Write the types of pickle.
- 6. Write the types of browning with example
- 7. What is blanching?
- 8. What is Cocoa Butter?
- 9. What is the function of salt in pickling?
- 10. Differentiate between squash and cordials.
- 11. What are the factors affecting gel formation
- 12. How is browning prevented?
- 13. What are spice oils?
- 14. What is the changes occurring during ripening
- 15. what is synersis of jam?

PART B

Each Carry 5 marks (Max.35 Marks)

- 16. Describe the process preparation of fruit cordial
- 17. Describe the steps in processing of black Tea.
- 18. What are pectic enzymes? Discuss their importance in ripening of fruits.
- 19. What are all the steps in manufacture of oleoresins?
- 20. Which are the different methods of peeling?
- 21. Explain manufacture of Chocolate.
- 22. Differentiate glazed fruit and candied fruit
- 23. Briefly explain preparation of tomato ketchup. Give the specification.

PART C

Answer any two of the following

(2x10 = 20 Marks)

- 24. What are the steps involved in canning of fruits.
- 25. Steps involved in manufacture of Jams. Discuss defects in Jam preparation.
- 26. Give the different steps involved in Cocoa bean processing? Discuss the steps involved incoffee processing.
- 27. Discuss browning of fruits and vegetables and its prevention.

Open course

FTL 5 D 01 TECHNOLOGY OF SPICES (3 Credits)

Time 2 Hours Total 60 Marks

PART A

Each carry 2 marks (Max.20 Marks)

- 1. Name two Aromatic spice.
- 2. Name two Pungent spice.
- 3. Chemical used for bleaching Cardamom.
- 4. Name the alkaloid responsible for biting taste of Pepper.5 King of Spices
- & queen of spices.
- 6. Name the major spices of India.
- 7. What do you mean by "Garbling"?.
- 8. Define Spice.
- 9. What is the important use of Paprika?.
- 10. Mention the uses of Ginger oils.
- 11. Mention the important factors that affect quality of Chillies
- 12. What is function of "Aspirator" in processing Spices?

PART B

Each Carry 5 marks (Max.30 Marks)

- 13. What are Spice oils?.
- 14. How are Spices classified?
- 15. Briefly explain production of Oleoresin.
- 16. Explain steps in curing of Turmeric.
- 17. Explain the processing of cardamom
- 18. What are the uses of spices? 19.differentiate between Spices &

between Spices & condiments?

PART C

Answer any one of the following

(1x10 = 10 Marks).

- 20. Explain the different steps involved in processing of Black Pepper.
- 21. Explain important steps in extraction of Oleoresin.

FTL 5 D 02 FRUIT AND VEGETABLE PROCESSING (3 Credits) Time 2 Hours Total 60 Marks

PARTA

Each carry 2 marks

(Max.20 Marks)

- 1. Name the Tomato based product.
- 2. Instruments to measure sugar
- 3. Type of browning reaction in cut surface of Apples.
- 4. Name a fruit coming under the group Drupe.
- 5. Name a food additive.
- 6. What are Non-climatric Fruits? (Give example)
- 7. What do you mean by Encymatic browning?
- 8. Write any four changes during ripening of fruits.
- 9. What do you mean by fermentation? Name a fermented fruit basedProduct?.
- 10. Name four mango based products available in market.
- 11. What do you mean by blanching of vegetables?
- 12. What are class II preservatives?

PART B

Each Carry 5 marks (Max.30 Marks)

- 13. Write the P^H of low acid and High acid foods.
- 14. Which are the different methods of peeling.
- 15. Browning of fruits.
- 16. Ripening of Fruits.
- 17. Composition of leafy vegetables.
- 18. Write briefly processing of pickles
- 19. Explain briefly different types of storage of fruits & vegetable

PART C

Answer any one of the following

(1x10 = 10 Marks)

- 18. Write a note on classification of fruits. Discuss the general
- 19. Write a note on pickling. Give the function of ingredients.

FTL 5 D 03 FOODS & HEALTH (3 Credits)

Time 2 Hours Total 60 Marks

PARTA

Each carry 2 marks (Max.20 Marks)

- 1. Define food adulterants.
- 2. What are Carbohydrates? Give example.
- 3. What are fat soluble vitamins? Give example.4. What you mean by BMI?
- 5. What is Nutrients?
- 6. What are the major food groups?
- 7.7. What you mean by RDA?
- 8. Write the importance of enzymes.
- 9. What is preservatives?
- 10. What is Lactose Intolerants?
- 11. Name any two food source for protein.
- 12. Give examples for macro and micro minerals.

PART B

Each Carry 5 marks

(Max.30 Marks)

- 13. Briefly explain classification of food.
- 14. Write a short note on common adulterants found in food.
- 15. Enlist the food additives and write their importance in food preparation.
- 16. Write a short note on nutritional composition of food.
- 17. Write the functions of preservatives with examples.
- 18. Briefly explain food poisioning, write the symptoms and their control.
- 19. Write a short note on Types of work and Energy requirements.

PART C

(ANSWER ANY 1 QUESTION) (1X10=10)

- 20. What is life style diseases? Briefly discuss each of them.
- 21. Explain briefly about the digestion and absorption of nutrients.

A014 NUTRITION & HEALTH (4 Credits)

Time 2.5 Hours Total 80 Marks

PARTA

Each carry 2 marks (Max.25 Marks)

- 1. Define Health
- 2. What is mal nutrition?
- 3. What is under nutrition?
- 4. What is over nutrition?
- 5. What is spiritual health?
- 6. Name the food groups
- 7. The linkage between two amino acids in a protein
- 8. What is water balance?
- 9. What is goitre?
- 10. Essential Amino acids
- 11. What is the Energy value of carbohydrate and fats
- 12. Define Protein Efficiency Ratio.
- 13. Classify the type of water
- 14. What is saturated fatty acids and Give one example.
- 15. Two important factors affecting BMR

PART B

Each Carry 5 marks (Max.35 Marks)

- 16. Classify the carbohydrates and give one example to each
- 17. Specific dynamic action of Food
- 18. How protein quality will calculate?
- 19. Role of lodine in Diet
- 20. Write the functions of fats
- 21. Write a short note on BMR?
- 22. Write a note on dietery fibre
- 23. Write the digestive enzymes present in Gestro Intestinal Tract.

PART C

Answer any two of the following

(2x10 = 20 Marks)

- 24. How minerals are classified. Explain in detail the role of any two minerals in humannutrition
- 25. How are fats digested and absorped in the body? Mention the role of bile juice in fat digestion
- 26. Explain in detail the role of water soluble vitamins in the human system. Give any fourdeficiency disease
- 27. How nutrients are important to human health? Discuss in detail.

COMPLEMENTARY COURSE FOOD SCIENCE AND QUALITY CONTROL FTL1C01 PRINCIPLES OF NUTRITION

Number of Credits: 2

Objective

This course will provide students with an understanding of the basic concepts of adequate nutrition, the important of food and well-balanced diet, effects of good nutrition on health, factors which affect eating habits, description of nutrients, their sources, functions and the daily requirements. This will help to understand how key nutrients (carbohydrates, lipids, vitamins, minerals and water) affect health, disease, and energy balance and weight control. You will learn about nutrient requirements during physical activity and you will exp lore the field of vitamins and mineral supplements and about foods and water.

Course Outline

Unit 1 - Concept of nutrition: Definition of terms

Nutrition, under nutrition, malnutrition, symptoms and remedy, Health and nutritional status-adequate optimum and good nutrition Energy – Definition of calorie and Joule, Energy value of foods, Basal Metabolic Rate (BMR), factors affecting BMR (6hours)

Unit 2 - Food Guide

Nutrients supplied by foods. Basic five food groups – Cereals, pulses, fruits and vegetables, milk and meat, fats and sugar (3hours)

Unit 3 – Nutrients and Health: Water

Importance, distribution in body, function, sources, water balance, regulation and requirement, abnormalities in water balance. (3hours)

Unit 4 – Carbohydrates

Functions, sources, requirement digestion and absorption, effects of deficiency. (3hours)

Unit 5 – Fibers

Definition, classification, sources, role of fiber in human nutrition (3hours)

Unit 6 – Protein

Functions, sources, requirement, essential amino acids, determination of nutritional quality of proteins, digestion and absorption. (3hours)

Unit 7 – Lipids

Functions, sources, digestion and absorption, role of essential fatty acids, Health concerns in lipid nutritionobesity, hypertension, atherosclerosis, requirements and effects of deficiency. (3hours)

Unit 8 – Vitamins

Classification, sources, requirement, deficiency of Vitamin A, D, E, K, Ascorbic acid, Thiamine, Riboflavin, Niacin, Pyridoxine, Folic acid, Pantothenic acid. (3hours)

Unit 9 – Minerals

Functions, sources, deficiency of calcium, phosphorus, sodium, potassium, iron, iodine and fluorine. (3hours)

Unit 10 - Balanced diet

Meal planning, factors affecting meal planning, principles of meal planning. (1hour)

Unit 11 - RDA

Factors affecting RDA, principles deriving RDA (1hour)

FTL2C02 FOOD CHEMISTRY

Number of Credits: 2

Objective

This discipline encompasses the study of chemical process and interactions of all components of food and also provide how products change under certain food processing techniques and ways either to enhance or to prevent them from happening.

Course Outline

Unit 1- Carbohydrates

Classification, Structure, browning reaction, changes during cooking (2hours)

Unit 2 – Pectin

Composition & structure (2hours)

Unit 3 - Protein

Introduction to food proteins, classification, structure, physico chemical properties, denatuaration, reactions, protein determination, changes during cooking (6hours)

Unit 4 - Fats & Oils

Classification, saturated, unsaturate d, polyunsaturated fatty acids physical and chemical properties, refining of fats and oils - bleaching, deodorizing, hydroxylation, shortening, Products of fat - margarine, vanaspati, lard, tallow. (8hours)

Unit 5 – Enzymes

Classification, nomenclature, enzyme specificity, factors affecting enzyme activity, enzyme inhibition, role in food processing (4hours)

Unit 6 – Water

Introduction, physical and chemical properties of water, moisture in foods, hydrogen bonding, bound water (2hours)

Unit 7 – Pigments

Pigments in foods, chlorophyll, flavanoids, anthocyanin, anthoxanthins, quinines, xanthones, betalains, Effect of processing and storage on pigments, physical and chemical properties (4hours)

Unit 8 - Flavours

Flavour compounds in foods - terpenoids, flavanoids, and Sulphur compounds, effect of processing and storage on flavours (2hours)

Unit 9 - Properties of foods

Colloids – Properties, sols, gels, foam, emulsion and suspension (2hours)

FTL2C03P FOOD CHEMISTRY

Number of Credits: 2

Objective

- To provide practical awareness
- To test the presence of carbohydrates and proteins in food samples

Course Outline

Practical

- 1) Colour reactions of carbohydrates b) Estimation of reducing sugar
- 2) Colour reactions of proteins b) Estimation of protein.
- 3) Determination of acid value and free fatty acid.
- 4) Determination of acidity in fruit juices.
- 5) Determination of ascorbic acid

References

- Food Chemistry Owen R Fennema

FTL3C04 PRINCIPLES OF FOOD SCIENCE

Number of Credits: 2

Objective

This course demonstrates how the laws of science are at working in producing, processing, preparing and preserving food. To introduce the basic fundamentals of food science and the chemistry behind various food items.

Course Outline

Unit 1 - Plant Foods

Introduction to food science. (2hours)

Unit 2 - Cereals, pulses and legumes

Composition, nutritive value, antinutritional factors, changes during cooking. Germination and changes Germination.

Unit 3 - Fruits and vegetables

classification, composition, nutritive value, changes during cooking of vegetables, ripening of fruits (4hours)

Unit 4 - Spices and condiments

Classification, composition and use (4hours)

Unit 5 - Animal Foods: Milk and milk products

Composition, nutritive value, effect of acid, heat, enzyme, salt on milk, Processing of milk – clarification, pasteurization and homogenization, cheese, butter, skim milk powder, whole milk powder, condensed milk, yoghurt. (6hours)

Unit 6 – Egg

Structure, composition, nutritive value, grading, changes during storage, role of egg in food industry. (2hours)

Unit 7 – Meat

Structure, composition, nutritive value, post mortem changes, changes during cooking, ageing. (4hours)

Unit 8 - Fish and Poultry

Composition and nutritive value, fish products – fish meal, fish flour and fish oils. (4hours)

Unit 9 - Sugars

Liquid sweeteners, properties of sugar, reactions of sugar, stages of heating. (3hours)

FTL3C05P PRINCIPLES OF FOOD SCIENCE

Objective

- To provide practical awareness
- Be able to use the laboratory techniques

Course Outline

Practical

- 1) Determination of Moisture content Hot air oven method.
- 2) Determination of Ash content.
- 3) Determination of Gluten content in wheat flour.
- 4) Determination of Water absorption power of Maida
- 5) Preparation of jam.

References

FTL4C06 FOOD PRESERVATION AND QUALITY CONTROL

Number of Credits: 2

Objective

This course applies the principle of food science to control and assure the quality of food products and to understand the preservation and current practices of preservation techniques and the effects on product quality.

Course Outline

Unit 1 - Food Preservation

Significance of preservation, Methods of food preservation - low temperature, high temperature, preservatives, osmotic pressure, dehydration, irradiation. (8hours)

Unit 2 - Food Additives

Food additives – Role of food additives, antioxidants, chelating agents, colouring agents, curing agents, emulsifiers, flavour enhancers, flavour improvers, humectants and ant caking agents, leavening agents, stabilizers and thickners, artificial sweeteners, preservatives, food fortifiers. (8hours)

Unit 3 - Food Adulteration

Food adulteration – types of adulterants, common adulterants in foods, toxicants in foods, impact of food adulteration in humans. (8hours)

Unit 4 - Food Laws and Quality

Food laws and quality control – HACCP, Codex alimentarius, PFA, FPO, MFPO, BIS, AGMARK (8hours)

FTL4C07P FOOD PRESERVATION AND QUALITY CONTROL

Number of Credits: 4

Course Outline

Practical

- 1) Detection of adulterants in foods such as milk, honey etc.
- 2) Estimation of SO2 in fruit products.
- 3) Estimation of purity of potassium metabisulphite
- 4) Qualitative determination of benzoic acid

Model Question Paper FTL 1 C 01 PRINCIPLES OF NUTRITION (2 Credits)

Time 2 Hours Total 60 Marks

PART A

Each carry 2 marks Marks)

(Max.20

- 1. What is the daily energy requirement for a man and woman?
- 2. What is flurosis
- 3. What is Osteoporosis? Why it occurs?
- 4. What are the functions of protein?
- 5. What is the role of bile in fat digestion?
- 6. What are micro minerals? Give two examples
- 7. What are the deficiency symptoms of riboflavin?
- 8. Define balanced diet.
- 9. Write the basic five food groups
- 10. Write a note on Plant and animal protein
- 11. Name the vitamins which come under the category of Vitamin B complex.
- 12. What is scurvy

PART B

Each Carry 5 marks (Max.30 Marks)

- 13. What are carbohydrates.
- 14. What are Fat soluble vitamins, give its importance
- 15. What is peptide bond. How it is formed
- 16. briefly explain the digestive system
- 17. Classification of Carbohyd rates
- 18. How fats are classified
- 19. 19. How proteins are classified

PART C

answer any one, 10 Mark

- 20. Write the principles of meal planning.
- 21. How is nutritive value of protein determined? Compare animal and plantprotein quality.

FTL 2 C 02 FOOD CHEMISTRY (2 Credits)

Total 60Marks

Time 2 Hours

Part A

Each carry 2 marks (Max.20 Marks)

- 1. What is you meant y reducing sugar
- 2. Write structure of the simplest amino acid
- 3. What is wood sugar?
- 4. What is enzymatic browning.
- 5. Name the element and four rings present in chlorophyll
- 6. Which is the prosthetic group in haemoglobin?
- 7. What is citral?
- 8. What is meant by enzyme specifity?
- 9. What are essential amino acids? Give 2 examples.
- 10. Define iodine value of oils.
- 11. Draw the structure of glycerol
- 12. What are polysaccharides

PART B

Each

Carry 5 marks (Max.30 Marks)

- 13. What are suspensions
- 14. Why sucrose is a non-reducing sugar
- 15. What are betalains?
- 16. Write the structural difference between chlorophyll a and b.
- 17. Write the role of fibre?
- 18. What is native protein?
- 19. Write the composition of butter.

PART C, Answer any one, 10 mark

- 20. Write the effect of processing and storage on chlorophyll pigments in foods.
- 21. Write nomenclature and method of classification of enzymes and discuss

FTL 3 C 04 PRINCIPLES OF FOOD SCIENCE (2 Credits)

Time 2 Hours Marks

Total 60

PART A

Each carry 2 marks

(Max.20 Marks)

- 1. What is MFCS?
- 2. Which are the Muscle proteins
- 3. Name an enzyme which is used to tenderize meat.
- 4. Which is the Queen of spices
- 5. What is ageing of meat?
- 6. What are the pigments present in fruits and vegetables?
- 7. Name any antinutritional factor present in pulses
- 8. What is rigor mortis
- 9. Name the proteins present in egg
- 10. What is enzymatic browning?
- 11. What are the properties of sugars?
- 12. What is phosphatase test?

PART B

Each Carry 5 marks (Max.30 Marks)

- 13. Explain the composition of milk and effect of heat on it
- 14. Explain in detail the production of any two, milk product of commercial importance
- 15. Write a brief note on changes taking place in meat during curing and smoking.
- 16. Explain non enzymatic browning with example
- 17. Explain Caramalisation
- 18. Give a note on nutritive value of egg
- 19. Write a note on different spices

PART C

Answer any one carries 10 marks

- 1. Explain in detail the structure and composition of egg Highlight its importance in food industry.
- 2. Explain the physical and chemical changes that occur during heating of sugar What is its application in food industry?

FT 4 C 06 FOOD PRESERVATION AND QUALITY CONTROL (2 Credits)

Time 2 Hours Marks

Total 60

PART A

Each carry 2 marks

(Max.20 Marks)

- 1. What does GRAS stands for?
- 2. What is MFPO?
- 3. What is sharp freezing?
- 4. Name two foods which are preserved by the principle of osmosis.
- 5. What is the unit of radiation?
- 6. Name the only permitted inorganic preservative in fruits and vegetable products?
- 7. Name any two thickener
- 8. Name two natural colours
- 9. Name the pathogen commonly found in cereal products
- 10. What is food adulteration?
- 11. What are the causes of food spoilage?
- 12. What are artificial sweeteners? Name any two.

PART B

Each Carry 5 marks

(Max.30 Marks)

- 13. Describe food additives with suitable examples?
- 14. How do you classify preservatives?
- 15. Write a note on food irradiation
- 16.Explain different types of preservatives
- 17. Write atleast one test for determination of adulteration for four different foods
- 18. What are antioxidants.? Give example
- 19. What are colouring agents? Give different types

PART C

Each carries 10 marks

(1X10=10)

- 20. Write in detail different methods of food preservation
- 21. Explain the incidental contaminants and their harmful effects on the body.
