Maximum: 36 Weightage

FIRST SEMESTER M.Sc. DEGREE EXAMINATION, NOVEMBER 2016

(Regular/Supplementary/Improvement)

(CUCSS-PG)

CC15P CP1 C02 – NEUROPSYCHOLOGY

(Clinical psychology) (2015 Admission Onwards)

Time: Three Hours

PART-I

(Answer <u>all</u> questionsEach question carries <u>one</u> weightage)

- 1. NIMHANS Neuropsychological battery.
- 2. Visual pathway.
- 3. Tactile perception.
- 4. Bilateral lesions.
- 5. Higher cognitive functions.
- 6. Nervous system.
- 7. Cerebral peduncles.
- 8. Space-localization.
- 9. Behavioural observation.
- 10. Insula lobe.
- 11. Confabulation.
- 12. Telencephalon.
- 13. Neuropsychology.

14. Pons.

 $(14 \times 1 = 14 \text{ Weightage})$

PART-II

(Answer <u>any seven</u> questionsEach question carries <u>two</u> weightage)

- 15. Broca's aphasia.
- 16. How frontal lobe lesion result in personality and behavioural alterations.
- 17. Discuss lesions of temporal lobe.
- 18. Short term memory and parietal lobe.
- 19. Discuss MSE as a tool for provisional diagnosis.
- 20. Mesencephalon.
- 21. Explain lesions of telencephalon.
- 22. Occipital lobe and basic visual functions.

- 23. Discuss levels of consciousness.
- 24. Gerstmann's syndrome.

 $(7 \times 2 = 14 \text{ Weightage})$

PART-III

(Answer <u>any two</u> questionsEach question carries <u>four</u> weightage)

- 25. Elaborate anatomical divisions and specific functions of parietal lobe.
- 26. Give a detailed note on central nervous system.
- 27. Specific functions of frontal lobe. Discuss about lesions in frontal lobe.
- 28. Role of assessment in neuropsychology. Explain the commonly used tools for neuropsychological assessment.

 $(2 \times 4 = 8 \text{ Weightage})$
