02nd May 2020- Day 1

Topics

a) OBS (Open Broad Caster Software)-continues

       vi. Add window capture, display capture, text, & image

       vii. Second video with PowerPoint integration (Assignment 2)

b) SCR (screen-face recording app for Mobile phones)

       i) Introduction on SCR

Maybe we don't have a computer with us or suppose we are travelling. We can use our mobile phone to create tutorials very fast. You can show you in the screen also!!!

Screen Recorder app (SCR) - is a free unlimited screen capture app for recording your device's screen to video.
 Works with Android 5.0 Lollipop and above
You can create videos, make tutorials or record help videos complete with audio!

▪ No limit on recording time
▪ Audio recording (Pro)
▪ Android Material theme
▪ Show screen touches while recording
▪ Shake or switch screen off to stop
▪ Possibility to delay start of recording
▪ Banner during recording (Pro)

       ii) Download SCR & Settings

https://play.google.com/store/apps/details?id=com.nll.screenrecorder

       iii) First video content with PowerPoint on SCR

c) Editing videos on computer

We are going to our next section- Editing videos. There are many video editing softwares out there available in internet. We are going to learn an open source software – Kdenlive. Today we will download and install the soft ware.
Let us start download process

# 02nd May 2020- Day 2

Topics
