Report of Medical Coding

Objectives

- Understanding of Medical Terminology and Anatomy
- Mastery of Coding Systems and Guidelines
- Hands-on Coding Practice
- Understanding of Documentation Requirements

Report of Medical Coding Session

Department of Computer Science organized a session about the recent coding technology “Medical Coding” for the Final year students of B.Sc Computer Science and BCA on 1/11/2024 from 9.30 am to 12.00 pm at Russa Lab of Christ College (Autonomous),Irinjalakuda. The programme is coordinated by Ms Rasmi P M and Mr Thoufeeq Ansari,Assistant Professors of Department of Computer Science jointly with ALIF ACCADAMY,THRIPRAYAR. Medical coding is a crucial process in the healthcare industry that involves converting healthcare diagnosis, procedures, medical services, and equipment into universal alphanumeric codes. These codes are used for various purposes such as billing, insurance claims, medical research, and healthcare analytics. Proper medical coding

ensures accurate billing, efficient reimbursement, and compliance with regulatory requirements. Medical coding involves assigning specific codes to diagnoses, procedures, and services based on standardized code sets such as the International Classification of Diseases (ICD), Current Procedural Terminology (CPT), and Healthcare Common Procedure Coding System (HCPCS). These codes are used by healthcare providers, insurers, and government agencies for various purposes including billing, claims processing, quality reporting, and research.Students are very interested to here the new aspect of medical field.

OUTCOMES

1. Understanding of Coding Guidelines
2. Proficiency in Code Assignment
3. Increased Accuracy
4. Preparation for Certification
5. Awareness of medical Industry Trends
