# Topics covered

Introduction to python in Geology

- Comment, Print, Variable, Data Type, Input
- Basic Math with Python
- Conditional Operators and Conditional Programming using if-elif-else
- Looping in Python using for() and while()
- Data Containers in Python: List, Tuple, Set, Dictionary

Date: 27.11.2023 to 15.12.2023

<u>Time</u>: 3.00 - 5.00 pm

<u>Coordinators</u> Ms. Shaima M. M. Dr. Linto Alappat Dept. of Geology & Env. Science

#### **Course Code: GEO0PYGL**

#### The course started on November 27th 2023.

There were 100 students and 100 students completed the course. The course was of 50 hrs. duration (10 theory hrs. and 40 practical hours). The course was well-received by the students, who expressed gratitude towards the department for launching this course, which would help them in their future pursuits.

#### **Course Outcome**

The students felt that the class met their needs. Different facets of Python programming were given to them. This made the fundamentals of scientific data analysis and programming with the Python programming language easier for students to learn and comprehend (no prior programming expertise necessary). The goal of each session, which is a tutorial covering a particular topic, is to help students learn and acquire the skills necessary to use Python to perform typical data-related tasks. As a result, students came to appreciate the value of Python programming in geological research.

Course Coordinator: Shaima M M, Dr. Linto Alappat

### **Course Code: GEO0PYGL**

Number of Students	100
Date of Examination	30/09/22
Total Students who passed exam	100
Total Course duration	50 hrs

#### Feedback analysis:

- The ability to install Python, identify significant data kinds, and operate the Python interpreter's basic functions were all demonstrated to the students. The training helped the students grasp the fundamentals of Python programming.
- Students were able to comprehend how Python was used in a variety of subjects, including geology, and they expressed a desire to study Python more practically in order to solve additional geological problems.
- Students had the opportunity to communicate with experts in Python programming outside of the classroom.
- Most of the students enjoyed the classes.

Course Coordinator: Shaima M M. Dr. Linto Alappat

#### **Course Code: GEOOPYGL**

Students are evaluated on the basis of practical examination (70%), theory examination (20%) and Viva examination (10%). An application problem pertaining to geology was presented to each applicant in order to evaluate the student's application of the learned material. The remaining 80% of the student evaluation process consisted of problem solving utilising the fundamentals of Python programming and viva. Students who had successfully solved the problem were the only ones permitted to take the final test.

Course Coordinator: Shaima M M. Dr. Linto Alappat
