PG VALUE ADDED/ CERTIFICATE COURSE

“HARNESSING AI IN LITERARY RESEARCH

REPORT 2023-2024 Batch

On August 10th 2023 the PG department of English inaugurated a value education course on “Harnessing AI in Literary Research” for first year PG Students (2023-2025 batch). The course is designed to integrate modern technology with traditional literary studies, showcasing how Artificial Intelligence (AI) can enhance research methodologies and offer new perspectives in literary analysis.

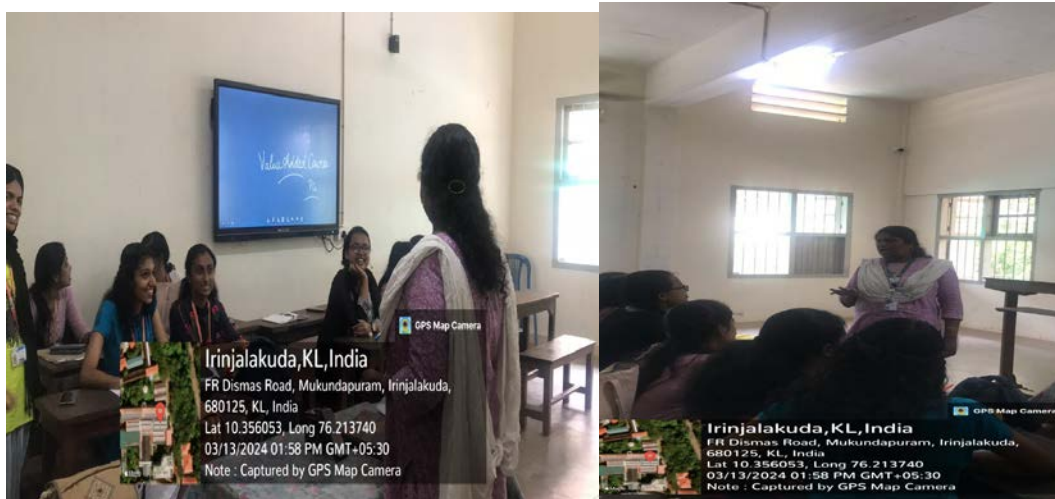

The classes were taken by the teachers of English department itself both in online and offline mode. A total number 23 students attended the course. Teachers who handled the course: Priya VB, Adeela VN, Shruthy Mohan, Shahana KM, Clinta PS Finnobin Lireesh, Jeethu Antony, Sreelekha Chandrasekharan and Sandrima Menon. The Classes were in both online and offline mode. The Course exam was conducted on March 2024

The syllabus for the *Harnessing AI in Literary Research* course offers a comprehensive introduction to the integration of AI in literary studies. It is designed to introduce students to AI concepts, tools, and their applications in both literary analysis and creative writing. Through modules on Natural Language Processing (NLP), AI-generated literature, and collaborative writing with AI, students learn to use cutting-edge technologies like GPT-3 for brainstorming, sentiment analysis, and text mining. The course also addresses ethical considerations and explores AI's role in publishing and future trends in literary research. The objective is to provide students with the tools to enhance both their analytical and creative skills through AI. Upon completion, students will be equipped to use AI for research, literary criticism, creative collaboration, and explore new opportunities in the evolving academic landscape. At the end of the course students submitted AI based mini project and all those who submitted and used the AI tools were provided with certificates.

VALUE-ADDED COURSE -MA ENGLISH LITERATURE 2023

"Harnessing AI in Literary Research"

COURSE CODE - CPCC50

Course Description: This comprehensive 30-hour course is designed for MA English Literature students who wish to advance their research paper preparation using AI. This will guide the students through an in-depth exploration of how to effectively integrate AI technology into their literary research process. By the end of this course, students will have the knowledge and skills to leverage AI to enhance their research, craft compelling arguments, and produce high-quality research papers. This course explores the intersection of artificial intelligence and literature, providing students with a comprehensive understanding of how AI is reshaping the world of creative writing, analysis, and literary scholarship

Course Outline:

Module 1: Foundations of Artificial Intelligence

- Introduction to AI concepts, sites, and tools.
- Fundamentals of Natural Language Processing (NLP)
- Text analysis techniques and tools

Module 2: Introduction to AI in Literature

- Historical context and key developments in AI and literature
- Ethical considerations in AI-generated literature
- Understanding the role of AI in modern research overview of ChatGPT and its capabilities

Module 3: AI-Generated Literature

- Generating Research Ideas Using ChatGPT for brainstorming and topic generation
- Generative language models (e.g., GPT-3)
- AI-generated poetry, prose, and storytelling

Module 4: AI and Literary Analysis

- Sentiment analysis and literary criticism
- Text mining and distant reading
- Case studies in AI-assisted literary analysis

Module 5: Human-AI Collaboration in Creative Writing

- Collaborative writing with AI tools
- Exploring the role of AI in enhancing creativity
- Ethical considerations in AI-augmented creativity

Module 6: AI and Publishing

- AI-driven content editing, curation, and recommendation
- Publishing industry trends and challenges
- Proof reading and editing techniques

Module 7: Research and Future Trends

- Emerging trends in AI and literature research
- Opportunities for MA theses and research projects
- Exploring the evolving landscape of AI in academia
