Course Coordinator Report

Certificate Course: Advanced Web and .NET Development - CPCC77
Organized by: Department of B.Voc IT, Christ College
Batch: 2022 and 2023
Duration: 35 Hours

1. Introduction

The Certificate Course on "Advanced Web and .NET Development" was conducted for the B.Voc IT students (2022 and 2023 batches). The course's primary objective was to enhance students' proficiency in web development and programming using modern technologies such as HTML, CSS, JavaScript, and .NET Core.

The course was organized by the **Department of B.Voc IT** in collaboration with **Aptech Education** and was held at the B.Voc IT Lab, Christ College.

2. Objectives of the Course

- To equip students with practical knowledge of web development tools and techniques.

- To introduce the fundamentals of programming using VB.NET and .NET Core.

- To provide hands-on experience in creating full-stack applications.

3. Course Details

Batch	No. of Students	Duration	Location
2022 Batch	21 students	35 Hours	B.Voc IT Lab, Christ College
2023 Batch	44 students	35 Hours	B.Voc IT Lab, Christ College

4. Course Modules and Syllabus Coverage

Module 1: Web Development Basics (HTML, CSS, JavaScript)

- HTML structure, forms, and validation

- CSS for layout, transitions, and animations

- JavaScript fundamentals, including DOM manipulation

Module 2: Introduction to .NET Core and C#

- Building APIs using .NET Core

- CRUD operations with Entity Framework Core

- C# programming concepts: OOP, LINQ, asynchronous programming

Module 3: Integrated Projects

- Developing responsive websites
- Creating a full-stack application using .NET Core backend and Angular/React frontend

5. Assessment Procedure

- **Practical Assignments (40%):** Hands-on tasks during the course.
- **Mini-Project (40%):** Developing a web or .NET-based application.
- **Written/Oral Test (20%):** Evaluating theoretical knowledge.

6. Outcomes Achieved

- Students gained the ability to design responsive web pages using HTML, CSS, and JavaScript.
- Participants demonstrated an understanding of .NET Core architecture and developed full-stack applications.
- Enhanced employability skills by integrating both frontend and backend development tools.

7. Acknowledgments

The successful completion of the course was possible due to the dedicated efforts of:

- **Department Faculty:** For delivering the course content effectively.
- **Aptech Education:** For their support in technical expertise.
- **Christ College Administration:** For providing the necessary infrastructure and resources.

8. Suggestions for Future Courses

- Include advanced topics like cloud deployment or containerization using Docker.
- Extend the course duration for more in-depth hands-on sessions.
- Organize guest lectures from industry professionals to provide real-world insights.

Prepared by:
Reeja John
Course Coordinator
Department of B.Voc IT, Christ College

Christ College B.Voc IT Department

Certificate Course: HTML & Web Design

Batch: 2022 & 2023

Duration: 1.5 Hours   **Total Marks: 50**

Part A: Short Answer Questions (5 × 2 = 10 Marks)

Answer all questions. Each question carries 2 marks.

1. Define HTML and explain its significance in web development.

2. What is the difference between <div> and <span> tags in HTML?

3. List and describe any two HTML5 elements used for multimedia.

4. What is the purpose of the <form> tag in HTML?

5. Write the syntax of an HTML comment and give an example.

Part B: Medium Answer Questions (3 × 5 = 15 Marks)

Answer any three questions. Each question carries 5 marks.

6. Explain the difference between ordered and unordered lists in HTML. Create examples of both.

7. What are semantic tags in HTML5? Discuss their importance with examples.

8. Design an HTML table to display the following information:

   o **Headers:** Product Name, Price, Quantity

   o **Rows:** Fill with three sample products.

9. Write the HTML code to embed a video and an audio file on a webpage. Include controls for both.

Part C: Practical Problems (2 × 10 = 20 Marks)

Answer any two questions. Each question carries 10 marks.

10. Create an HTML form with the following fields:

- o Name (text input)
- o Email (email input)
- o Password (password input)
- o Gender (radio buttons)
- o Hobbies (checkboxes)
- o Submit and Reset buttons

11. Write the HTML code for a webpage with the following features:
- o A header with the title "Welcome to Web Design"
- o A navigation menu with three links: Home, About, Contact
- o A main content section with a paragraph describing web design.
- o A footer with copyright information.

12. Design an HTML page that displays:
- o An image with a caption.
- o A hyperlink that opens a new tab when clicked.
- o Use inline CSS to style the image and the link.

Part D: Mini-Project (1 × 5 = 5 Marks)

Answer the following question.

13. Describe the steps to create a webpage that includes:
- o A contact form
- o A table displaying the team members of a project
- o A styled button using CSS.

Christ College B.Voc IT Department

Certificate Course: VB.NET Programming

Batch: 2022 & 2023

Duration: 1.5 Hours   **Total Marks: 50**

Part A: Short Answer Questions (5 × 2 = 10 Marks)

Answer all questions. Each question carries 2 marks.

1. Define VB.NET and mention its key features.

2. Explain the purpose of the Dim keyword in VB.NET.

3. What is the difference between MsgBox and InputBox in VB.NET?

4. Write the syntax of a For...Next loop in VB.NET.

5. What is a module in VB.NET, and how is it different from a class?

Part B: Medium Answer Questions (3 × 5 = 15 Marks)

Answer any three questions. Each question carries 5 marks.

6. Explain the concept of Object-Oriented Programming (OOP) in VB.NET. Provide an example demonstrating the use of a class and object.

7. What are events in VB.NET? Illustrate their use with an example of a button click event in a Windows Forms application.

8. Write a VB.NET program to calculate the factorial of a number using a Do...While loop.

9. Explain how error handling is implemented in VB.NET using Try...Catch...Finally blocks.

Part C: Practical Problems (2 × 10 = 20 Marks)

Answer any two questions. Each question carries 10 marks.

10. Write a VB.NET program to:

    o Accept the name and age of a user through an input box.

o Display the data in a message box.

o Check if the user is eligible to vote (age ≥ 18).

11. Develop a Windows Forms application in VB.NET with the following features:

o A form containing text boxes for name and email.

o Buttons for Submit and Reset.

o Display the submitted information in a label on the form.

12. Write a VB.NET program that uses an array to store five numbers. Calculate and display:

o The sum of all numbers

o The largest number in the array

Part D: Mini-Project (1 × 5 = 5 Marks)

Answer the following question.

13. Design a simple calculator in VB.NET that can perform basic operations (Addition, Subtraction, Multiplication, and Division) using buttons and text boxes in a Windows Forms application.

Certificate Course Report

Title: Advanced Web and .NET Development

Organized by: Department of B.Voc IT, Christ College

Batch Information:

- **Participants:** Students of B.Voc IT, 2022 Batch and 2023 Batch

- **Total Participants:** XX (you can specify the exact number)

- **Duration:** 35 hours (divided into 32 hours of classroom and lab sessions and 3 hours for assessment and project presentation)

Course Venue:
B.Voc IT Lab, Christ College

Collaborative Partner:
Classes were conducted with the support of **Aptech Education**, leveraging their technical expertise and resources.

Course Syllabus:

1. **Module 1: Building Next Generation Websites (HTML, CSS, JavaScript)**

   o **Topics Covered:**

      - Basics of HTML, CSS, and JavaScript

      - Creating web pages with tables, forms, sections, and validation

      - CSS animations, layouts, transitions, and advanced properties

      - Introduction to JavaScript functions, arrays, objects, and event handling

   o **Practical Work:**

      - Designing responsive web pages

      - Integrating media elements like images, audio, and videos

2. **Module 2: .NET and C# Programming**

   o **Topics Covered:**

      - Creating Web API projects with .NET Core

      - CRUD operations with EF Core and MySQL integration

- Introduction to C# fundamentals: OOP concepts, LINQ, and asynchronous programming
- Frontend integration using Angular or React
  - **Practical Work:**
    - Developing small-scale projects combining .NET backend and modern frontend frameworks

Course Structure:

Session	Topics Covered	Hours
Session 1	Basics of HTML and CSS	2 hrs
Session 2	JavaScript Fundamentals	2 hrs
Session 3	Web API Project Setup (Dotnet)	4 hrs
Session 4	Advanced Dotnet Features	6 hrs
Session 5	Lab Sessions for Practice	12 hrs
Session 6	Final Project Design and Review	6 hrs
Total		**35 hrs**

Infrastructure Requirements:
The sessions were successfully conducted using:

- Intel Core i3 or higher systems with 4 GB RAM
- Essential software like CoffeeCup HTML Editor, Dotnet Core, and VSCode
- LCD projector for visual presentations

Outcome:

- Participants gained hands-on experience in web development and .NET technologies.
- Enhanced understanding of HTML, CSS, JavaScript, and modern development practices.
- Developed projects integrating backend (Dotnet Core) and frontend (Angular/React).

Acknowledgment:
Special thanks to the department faculty and **Aptech Education** for their invaluable contribution to the course delivery and for mentoring the students.

Assessment Components Report For Certificate Course

A. Practical Assignments (40%)

- Participants were assigned practical tasks related to:
    - Designing a responsive web page using HTML, CSS, and JavaScript.
    - Implementing CRUD operations using .NET Core and MySQL.
    - Developing a Single Page Application (SPA) integrated with a .NET Core Web API.

Evaluation Criteria:

- Code functionality and correctness.
- Efficient use of development tools and technologies.
- Creativity and adherence to design principles.

B. Mini-Project (40%)

- Participants were required to create a small-scale project combining:
    - A dynamic web interface (HTML/CSS/JavaScript).
    - Backend logic and data persistence using .NET Core with EF Core.
    - Integration of the frontend and backend components.

Evaluation Criteria:

- Completion of all project objectives.
- Clean and modular code structure.
- UI/UX design and responsiveness.
- Presentation of the project with proper explanation of functionality.

C. Written/Oral Test (20%)

- A written or oral test was conducted to evaluate theoretical knowledge of key topics:

- HTML/CSS/JavaScript fundamentals.
- Dotnet Core concepts like dependency injection, middleware, and routing.
- C# concepts such as OOP, LINQ, and asynchronous programming.

Evaluation Criteria:

- Conceptual clarity.
- Problem-solving skills.
- Ability to explain technical concepts.

2. Grading Structure:

- **A+ (90% and above):** Exceptional performance in practical and theoretical components.
- **A (80%-89%):** Strong grasp of concepts and consistent application of skills.
- **B (70%-79%):** Satisfactory performance with room for improvement.
- **C (<70%):** Basic understanding; needs significant improvement.

3. Feedback and Certification:

- Participants received personalized feedback highlighting strengths and areas for improvement.
- Certificates of Completion were awarded to all students scoring 70% or above, while top performers were recognized with a special distinction.
