NET COACHING 2022-23

The Net Coaching program at Christ College for the academic year 2023-24 commenced on June 22, 2023. This report provides an overview of the program, highlighting its hybrid nature and the collaboration between the Department of Economics and Apple B Institute for the Learning Management System (LMS). Fifteen students were admitted for net coaching. The Net Coaching program for this academic year adopts a hybrid mode, combining online learning through Apple B Institute's Learning Management System (LMS) and offline classes organized by the Department of Economics. This hybrid approach aims to provide flexibility while maintaining the benefits of face-to-face interactions. The LMS is provided by Apple B Institute, offering a user-friendly platform for students and faculty. Features of the LMS include virtual classrooms, multimedia content, discussion forums, and assessment tools. Regular training sessions are conducted to familiarize both students and faculty with the functionalities of the LMS. The Department of Economics at Christ College is actively involved in organizing offline classes to complement online learning. Regular assessments, quizzes, and interactive sessions are conducted to gauge student understanding and participation. The hybrid mode encourages students to actively engage with both online and offline components, fostering a dynamic learning environment. Faculty members from the Department of Economics are actively involved in course planning, content delivery, and offline classes.
