(2015 Admission onwards)		
Time: Three Hours		Maximum: 75 Marks
Part A		
Answer any <i>three</i> questions.		
1. (a) Read the following passage and answer the questions in a sentence or two:		
	<p>Global water use has increased by six times in the past century. Water demand is growing twice as fast as the population. However, the World Water Development Report states that at least four billion people experience water scarcity for at least one month each year. Accessing safe drinking water is crucial for global water security. Contaminated water is responsible for about 80% of the disease burden in developing nations, causing significant physical, psychological, and economic hardships. It also leads to millions of infants worldwide, with diarrhoea being the second leading cause of death for children under five. Increasing reliance on groundwater also presents new challenges due to geological contamination. With 17% of the global population, India only has 4% of fresh water. Water availability differs within the country, with the east and north having more resources than the south and west. Climate change leads to more drought and floods, making weather patterns unpredictable. This has impacts on the environment, societies, and sustainable development. Climate change and water security are interconnected issues with significant implications.</p>	
	<p>1. What does the World Water Development Report say about water scarcity?</p> <p>2. What is regarded as crucial for global water security?</p> <p>3. What are the negative impacts of using contaminated water?</p> <p>4. What is the status of water availability in India?</p> <p>5. How does climate change impact water security?</p>	
		(5 × 2 = 10 Marks)
	(b) Write a precis of the above passage in about one-third of its length.	
		(1 × 5 = 5 Marks)

(5 × 1 = 5 Marks)

(c) Make notes of the following passage:

Human rights are rights inherent to all human beings, regardless of gender, nationality, place of residency, sex, ethnicity, religion, color and other categorization. There are a variety of human rights, such as civil rights, political rights, economic rights, social rights, cultural rights, and collective rights. Human rights are non-discriminatory, meaning that all human beings are entitled to them and cannot be excluded from them. Of course, while all human beings are entitled to human rights, not all human beings experience them equally throughout the world. Many governments and individuals ignore human rights and grossly exploit other human beings.

(1 × 5 = 5 Marks)
