

The most important highlight of the talk series was its final one on the day of Women's day (8th March 2021). The resource person was Ms.Sajitha Madathil, cine artist and dramatist who delivered an informative session about WOMEN AND THEATRE. She explains that till 16th and 17th century there was no mentions about the name of women actors. Even the women's name was considered as a non-serious writer. She made remark on women's day as women were just bounded to a specific day for mere a namesake and the happenings against women around the world were just paradoxical to do so. Then she delivered a serious talk on the subject, women and theatre. She shared her harmful and worst experiences faced through social Medias. It was really an informative session and students feel lucky to be in the session. The session was marked with a large and active participation among the students.

Dr. Sreevidhya.V Convenor, Women's Development Cell Christ College.
