**Part A**

Answer any *three* questions.

1. Read the following passage and answer the questions given below:

- (a) Simple definition of Online Shopping or Shopping on the Web is enabling you to buy and sell through your computer online using Web or Internet environment. One reason people like online shopping is you can browse inside the shop for number of hours at your leisure time without a sales person peering over the shoulder and making unwanted recommendations. As a customer, we may find this approach convenient and less time consuming, but how does this affect the economy as a whole? Is it safe to pay credit card online? Is virtual shopping really better than the real thing? Cyber space is a vast territory where computers meet and exchange information. In this 21st century, cyberspace has already helped you to connect to huge amount of goods and services globally. Not only does it allow you to talk to your friends on the other side of the world, but also allows you to watch a movie, buy airline tickets, pay bills and even get cash. Internet shoppers still believe that there is no secure and convenient way of paying on the internet. Consumers are concerned with two main security fears, they are worried that their credit card information is jeopardising, while travelling over the net. They also express concern over data privacy where by the vendors and banking institutions can tamper with the data and easily record their purchasing habits, these fears over privacy and security have kept E-commerce from taking off.

- (i) What does the passage imply by the word 'virtual shopping'?  
 (ii) Define Online Shopping.  
 (iii) What are the reasons people like Online Shopping?  
 (iv) What are the major usages of Cyberspace?  
 (v) Which are the main security fears of the consumers?

(5 × 2 = 10 Marks)

(b) Write a precise of the above passage in about one-third of its length.

(1 × 5 = 5 Marks)
