Dr. Eve Levin
(Professor Emeritus,
Kansas University,USA)

On 10th & 11th November, 2020

Platform: Zoom Meet

Dear Madam/Sir,

Historical writing is not merely cobbling together facts taken from various sources. A well written history must answer a variety of questions. These questions are not confined solely to what and when happened, most vital questions are why and how. In order to produce such a historical work, the writer must have involved in three basic processes; gathering data, external and internal criticisms of data, presentation of facts, interpretations and conclusions based up on the data in an accurate and readable form. Language is the medium through which the historians / researchers communicate her/historical knowledge. Besides analytical skill historians should also possess communication skills. Uninteresting to the reader, at the same time, literary artifices should not be at the expense of methodological and analytical rigour. This two-day international webinar on 'A Beginners introduction to writing History' aims to address these issues.

We welcome teachers, researchers, and students to participate and share their views on this topic. We expect a scintillating discussions.

Rev. Dr. Jolly Andrews C M I
